OBJECTIVE:

To strive for academic excellence and impart quality education with emphasis on Computer Science & Engineering. To include the habit of executing effective implementation and rectification of Computer Engineering problems in the minds of all concerned, which they can apply in their professional life in the future.

Summary:-

- **Completed M.E. in Computer Science & Engineering with First class.**
- Degree First Class in B.E. Computer Science & Engineering.
- First Class with Distinction in HSC & SSC.
- **Having 10.5 years of Teaching Experience.**
- Subject taught DBMS, OOAD, ADBMS, IR, Programming Paradigm, Computer Network
- Worked as a MSCIT-Controller & Internal /External Examiner in Pune University.
- Paper published:-**04** in International Conference, **03**-Journal & **06** in National level conference
- Workshop/Seminar attended:13
- Worked as Departmental Association Coordinator (ITERA) & incharge of events (like Skit, Arts & Crafts, Dance) in Annual Gathering
- Life time Member of Indian Society of Technical Education (**LMISTE**).
- Worked as a Coordinator for the project named as "Online Examination System" at college level

❖ **ME Project**

Project Title: “*Hiding Sensitive Association Rules in Data Mining*”

Language: Java(NetBean)

Description: Data mining techniques have been widely used in various applications. However, the misuse of these techniques may lead to the disclosure of sensitive information. Researchers have recently made efforts at hiding sensitive association rules. Nevertheless, undesired side effects, e.g., non sensitive rules falsely hidden and spurious rules falsely generated, may be produced in the rule hiding process. This project present an approach that strategically modifies a few transactions in the transaction database to decrease the supports or confidences of sensitive rules without producing the side effects.

❖ **Final Year Project (BE)**

Project Title: “*JMOL – 3D Molecular Viewer*”

Language: Java,

Description: JMOL is an Molecular Viewer and editor written in JAVA. JMOL provides a platform independent means of viewing 3D molecular models produced by various S/W packages (Guassian 9X, XYZ, PDB, and CML). Molecular models can be translated and rotated. Geometric properties can be calculated, such as BOND LENGTH, BOND ANGLES. Molecules displayed can printed or exported in several graphics formats such as JPG,GIF.

Projects Done During Course Curriculum

- Developed a website on “**Medical College Website**” Which provides information of the different Colleges using HTML (3rd Sem).
- Developed a Mini project on “**Electric Bill**” using V.B.6.0 & Oracle 8I (7th sem)
- Developed a Mini project ”**Computer Assembly**” for Multimedia using Macromedia Flash(8th sem).
- Developed a Mini project on “Medical Image Registration(Compute Vision)” in MATLAB (ME-4th Sem)
