Vision: To emerge as the leading Computer Engineering department for inclusive development of students.

Mission: To provide student-centered conducive environment for preparing knowledgeable, competent and value-added computer engineers.

1. Introduction

IIT Bombay has conducted many large-scale teacher training workshops under the Train 10,000 Teachers (T10KT) programme, sponsored by the National Mission on Education through ICT (NMEICT), MHRD, Govt. of India, and trained over 2,00,000 teachers.

Another successful technology developed at IIT Bombay is Spoken Tutorial, using which about 50 lakh students have been trained on various ICT topics. The effectiveness of this method can be seen from the testimonials available here: <https://spoken-tutorial.org/testimonials/media/?foss=70> and the [TEDx talk](#). This project is funded by NMEICT, MHRD.

It is now proposed to offer the highly effective Spoken Tutorial based ICT training to a large number of teachers, across the country, through the T10KT methodology, with C and C++ training being taken up next.

C and C++ are used for developing operating systems, compilers, parsers, interpreters, word processors, search engines and graphic programmes, to mention a few.

* **Support:** C requires less runtime support.

* **Portable programming language:** A variety of C and C++ programmes written for one computer system, can be compiled and run on another system, with little or no change.

* **Modular:** Written in routines called functions and classes, (C++) programs can be used in other applications or programs.

* **Preferred by professional programmers:** A variety of C and C++ resources and helpful support are widely available.

* **Standardized:** Many standards have been documented, maintained and updated for C and C++ as standard references.

The Spoken Tutorial project at IIT Bombay (<https://spoken-tutorial.org>) has been promoting C and C++, and other FLOSS (Free/Libre and Open Source Software), such as Scilab, Python, OpenFOAM, eSim, Osdag, OpenModelica, DWSIM, Drupal and R, and Open Source hardware, such as Arduino and OpenPLC.

The C and C++ workshop is organised by the Teaching Learning Centre (TLC) at IIT Bombay, funded by the *Pandit Madan Mohan Malaviya National Mission on Teachers and Teaching (PMMMNMTT)*, MHRD, Govt. of India. As Spoken Tutorial method offers hands-on practice, with 100% active learning, those who undergo this training will be able to start using C and C++ immediately after the workshop. They will also be able to conduct C and C++ workshops for their

students, using Spoken Tutorials, without requiring any help from anyone else.

The one day C and C++ main workshop will be conducted on **Saturday, 29 February 2020**, through the [select Remote Centres](#) of IIT Bombay. This will be a blended training programme that uses A-VIEW for live interactions and Spoken Tutorials to learn to use C and C++. The medium of instruction for this workshop is English. Language dubbed Spoken Tutorials in 15+ Indian languages will also be available.

2. Methodology of the Workshop

It will be a one day workshop, on **29 February 2020**. All participants will have to go to their chosen Remote Centre. They will learn C and C++ through the active method of reproducing every command demonstrated in the award-winning Spoken Tutorials. As learning happens through self-learning, the self-confidence of the learners is very high. Moreover, they can use the same method to train their students on the important topic of C and C++, using Spoken Tutorials.

All the participants from all the Remote Centres, will be able to interact with the C and C++ team at IIT Bombay, ask them questions, etc. through the video conferencing software A-VIEW. There will be about 4 hours available for C and C++ training and 2 hours for interactions.

A timed discussion forum <https://forums.spoken-tutorial.org/> will be used to answer the questions that the participants may have in different Remote Centres. One has to select the Spoken Tutorial, and the exact time (minute and second) when the doubt arises. It will be answered immediately by one of the volunteers. Answers can also be provided by other participants in the same Remote Centre or in other Centres. These answers double as additional learning material. This video explains how to use the Forum: <https://youtu.be/H8YjIfkwbJk>

Course Coordinators at Remote Centres, already trained for this purpose, ensure that the workshop goes through smoothly.

Using this approach, we have trained 3,500, 4,200, 4,300, 5,300, 2380, 2400, 2800 and 1500 teachers, respectively, on Koha, Moodle, Scilab, Python, eSim, Linux, R and Arduino

workshops in the past 1 year. We expect to train about 5,000 teachers through this workshop.
