Aim / Purpose:

The Add-on-Course is a group of technological hands-on training on recent technologies organized by our department every year. To bridge the gap between the academic and industry need, Add-on-Course is conducted regularly at our department, where students learn additional technologies apart from their main course.

The main purpose of the Add-on-Course is to supplement the curriculum with recent technologies to make students better prepared to meet industry demands as well as develop their own interests and aptitudes.

Objectives:

1. To enhance knowledge of students in recent technologies and softwares.
2. To Increase programming for problem solving capabilities of students.
3. To boost the competency and relevance of students credentials as a professional

Participant's Profile: All the students from Computer and I.T. Engineering having basic knowledge of programming in C

Number of Students Attended: 425

Description about the Program:

Department of Computer Engineering has organized the technical **Add-on-Course** from October 26th to 30th 2021, in online mode. On Day 1 Prof.Dr.K.P.Adhiya HoD gave the preface on Add On Courses and Ms.NilimaRamteke and Ms.Tejashri Patil, conducted a hands-on session on HTML and CSS and Javascript for Web Developers On day 2 Mr. Sandip Patil, Ms.Shital Patil and Ms. Dhanshri Sapkale conducted a hands-on session on R Programming. On Day 3 Ms.Priti Sharma and Ms. Dimpal Patil conducted a hands-on session on Angular 9. On Day 4 Ms.Dhanshri Tayade and Ms. Sana Deshmukh conducted a hands-on session on C# and

Vision: To emerge as the leading Computer Engineering department for inclusive development of students.

Mission: To provide student-centered conducive environment for preparing knowledgeable, competent and value-added computer engineers.

Mr. Sandip Patil conducted hands-on session on R Programming

Different Types of Data Binding in Angular

Data Binding is the important concept of Angular II. Allow us to define the communication between component and view. Data Binding is passed from component to view and from view to the component.

Why we use Data Binding?
With data binding, we need not to worry about keeping data in sync and refreshing the data when the data is updated. Which not only gives an excellent and intuitive experience to the user but also makes managing the data very easier.

Types of Data Binding and examples:

Ms. Dimpal Patil conducted hands-on session on Angular 9

Vision: To emerge as the leading Computer Engineering department for inclusive development of students.

Mission: To provide student-centered conducive environment for preparing knowledgeable, competent and value-added computer engineers.
