Women's Entrepreneurial Empowerment

10/03/2023

On the occasion of Women's day the Women's Entrepreneurial Empowerment program is held on 10-03-2023. In this regards the Guest say Empowerment entails creating an environment that fosters growth. For small businesses, empowerment can take many forms, each with the potential to enhance your organization's efficiency and profitability, as well as your ability to work with others toward common goals. Women entrepreneurship is about women's position in the society and their role as entrepreneurs in the same society. It can be understood in two ways, namely, at the individual level (number of self-employed) and at the firm level (number of firms owned by women and their economic impact).
