* **Organizational Chart and Processes**

The style of management is integrative, participative and consultative at every decision making stage. Duties and responsibilities of various functionaries are well laid down. The organizational chart clearly depicts the flow of authority, responsibility and accountability. Hence the decision making process is transparent.

* **Nature and Involvement of faculty and Students in Academic Affairs and Improvements.**

Extent of faculty involvement in academic affairs is governed at three levels . Principal meets all Heads of Department every month to take stock of academic progress, course coverage activities. A more detailed interaction of faculty is held fortnightly under direction of Director Academics. Heads of Department are on daily contact with respective faculty, attend their class, offer guidance on teaching skill and methodology besides weekly meeting with all faculties on weekly academic performance, identifying deficiencies and suggesting means to improve upon the same.

Every student gives feedback on all relevant subjects with regard to syllabi, course content, degree of difficulty, if any, in assimilation of the subject and suggestion on improvement. Students have direct access to any faculty, heads of department, coordinator academics and Principal to make suggestion on academic subject.

* **Mechanism /Norms & Procedure for Democratic & Good Governance.**

As mentioned earlier, Apex decision making body is the Board of Governance who decides and give broad direction. Governing Body has nominated local committees i.e.

College Development Committee which meet once in a quarter or earlier to check compliance of direction given by Governing Body. Day to day operation of the college is managed by Principal and other appointed staff. Various Local Management Committees are well represented by both teaching and non-teaching staff who effectively participate in the respective proceedings and help in observance of democratic and good governance practice of the college.

* **Student feedback on Institutional Governance/Faculty Performance.**

A committee of three Heads of Department under guidance of Director Academics and Principal meets students of all classes in each department and takes feedback on teaching

methodology and performance of faculties as perceived by them. This process takes place twice in a semester. The feedback is scrutinized and analyzed with a view to improve faculty performance.

* **Grievance Redressal Mechanism for Faculty, Staff and Students.**

Transparent management and administrative policy is by itself aids the redressal process in the college. The organizational chart gives out clear flow of authority and responsibility on both academic and administrative front. Faculty, Staff and Students are thus aware of the various processes and policies and can approach any functionary with any supposed difficulty which need to be resolved.

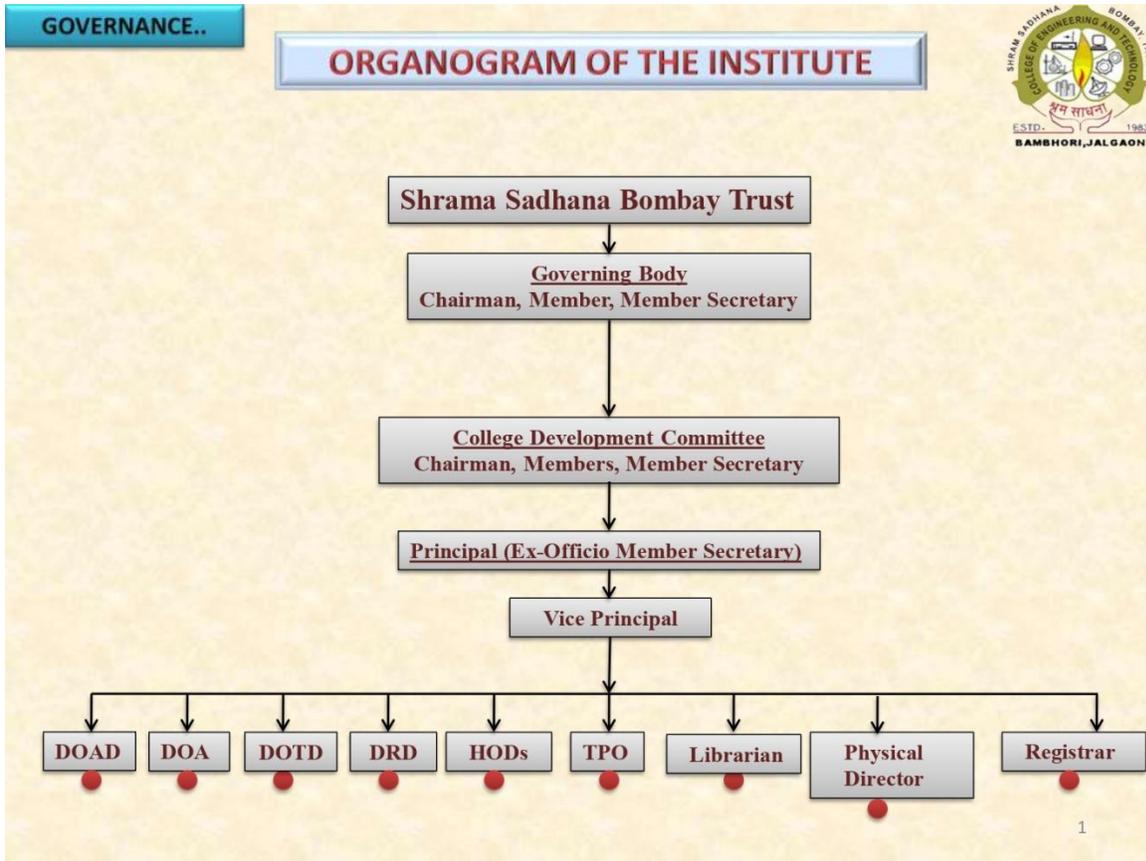

There are suggestion boxes placed at vantage points for all personnel to drop their ideas in confidence which are looked into with all seriousness.

* **Grievance Redressal Mechanism as per affiliating University.**

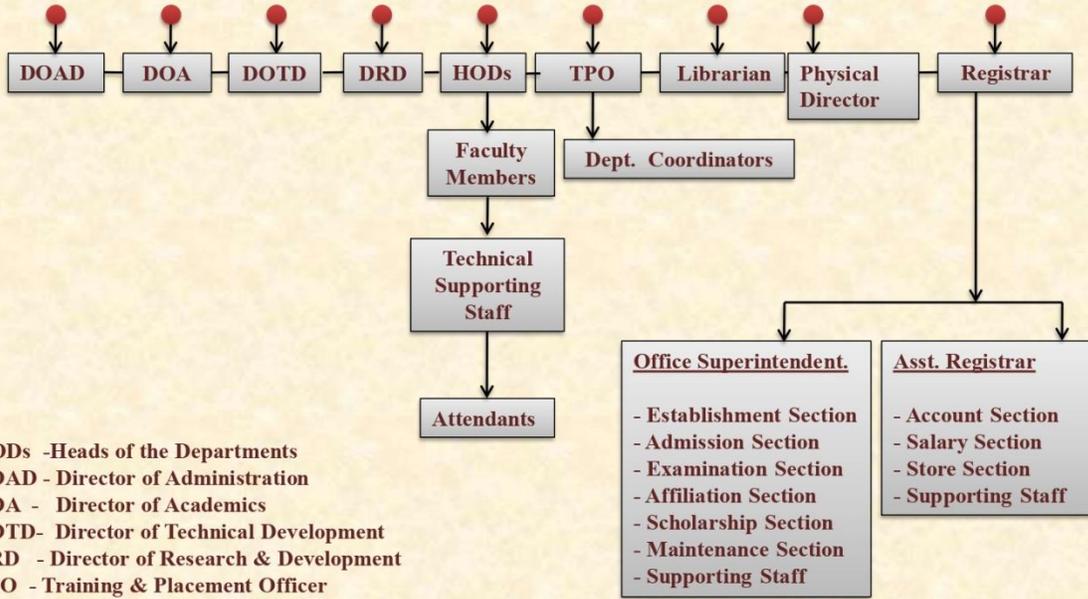

The vigilance committee is formed and which consists of Chairman (Member of CDC). All HODs, Rectors and Students Representative.

Also grievance cell is functioning in the college. The students grievances are looked into by the H.O.D. Concerned, Principal and if needed, they are referred to the management for appropriate decision. For Hostel the students approach the Rectors (Girls' Hostel and Boys' Hostel) and then they are referred to the Principal for appropriate decision.

2.9 Other eligibility criteria for specialized branches of Engineering/Technology:

Candidates seeking admission to some special courses or under some special provisions have to fulfill the following additional eligibility criteria.

- **Admission to Mining Engineering course:**

Female candidates are not eligible for admission to Mining Engineering course.

2.10 Eligibility criteria of Candidates who have passed Diploma in Engineering/Technology and seeking admission to First Year of Engineering/Technology in Unaided Institutes:

Diploma holders should have passed the Diploma course in Engineering/Technology with minimum of 50% marks (45% marks in case of candidates of Backward class categories and Persons with Disability belonging only to Maharashtra State) and medium of instruction as English from the AICTE approved Diploma Institutes affiliated to State Boards of technical Education.

Note:

1. To resolve a tie i.e. more than one candidate securing equal aggregate marks in Final year of the Diploma examination, following order of preference shall be adopted: marks in Maths at SSC, Grand Total at SSC.
2. Eligible Diploma candidates (rule 2.10) shall be considered for Admission against the Institute level seats in **Unaided Private Institutes only**. The details of the admission process for filling seats are specified in Annexure-II.

2.11 Rounding off of percentage of marks for deciding eligibility for admission.

In case percentage, marks (converted out of 100) in the subjects **Physics, Mathematics and Chemistry/Biotechnology/Biology/ Technical Vocational subjects** added together at HSC (std.XII), comes in fraction then percentage of marks shall be rounded off as explained in the example for the purpose of deciding the eligibility of the candidate.

Example: - If the percentage of marks comes out to be 44.50% to 44.99% then it shall be rounded to 45% and if the percentage of marks comes out to be 44.01% to 44.49% shall be rounded to 44%.

General Notes:

1. In case the maximum marks in individual subject is other than 100, convert the marks out of 100 for individual subject but do not *round off* these marks. If the sum of the converted marks of three individual subjects without rounding off works out to be a figure with fraction then fraction up to two decimal places shall only be considered and the percentage of marks shall be calculated considering maximum marks as 300 and, If the percentage comes in fraction, rounding off shall be done as given in rule No. 2.11 to decide the eligibility.

Example: If a candidate obtains 85 marks out of 200 in Physics, 76 marks out of 150 in Chemistry and 40 Marks out of 100 in Mathematics, then the sum of marks obtained works out to be 201 out of 450 marks. If it is converted out of 300, it works out to be 134. The % of marks comes out 44.6666 %.

However if the marks in individual subjects are converted out of 100, then the marks are as 42.5 in Physics, 50.6666 in Chemistry and 40 in Mathematics. It means the sum of converted marks of individual subject is 133.1666, which is 133.16 up to two fractions. The % of marks comes out 44.38 % after rounding off it is 44%. Hence the candidate is not eligible for admission.

2. If **letter grades** are assigned instead of marks at SSC, HSC or its equivalent examination the candidate must obtain the certificate of conversion of letter of grades into marks from the competent authority where from the candidate has passed the examination. The candidate should produce such certificate at the time of submission of application form. The Eligibility shall be decided based on the equivalent marks submitted by such candidates.

Institute Level Seat and Vacant Seat.

Candidate passing the HSC (Std. XII) or its equivalent examination with subjects English, Physics, Chemistry and Mathematics and should have secured minimum 50% marks in General Category and reserve Category 45% marks in Physics, Chemistry and Mathematics added together.

Candidates passing Diploma in Engg. / Technology course from Maharashtra State:

Diploma holders who have passed the diploma course in Engineering/Technology with minimum of 50% marks and reserve Category 45% marks from the Polytechnics affiliated to MSBTE or AICTE approved autonomous Polytechnics in Maharashtra State.

B) Minimum level of acceptance, if any.

Eligibility criteria for Maharashtra State Candidate and Outside Maharashtra State Candidate-

XI. CRITERIA AND WEIGHTAGES FOR ADMISSION

Each criteria with its respective weightages i.e. Gate examination marks & qualifying examination marks etc.

2 Eligibility Criteria:

2.1 Eligibility criteria for Maharashtra State Candidate and Outside Maharashtra State Candidate:

Candidate should be an Indian National and should have passed the HSC (Std.XII) examination of Maharashtra State Board of Secondary and Higher Secondary Education or its equivalent examination with subjects English, Physics, Mathematics and Chemistry/Biotechnology /Biology/ Technical Vocational subject

AND

Secured minimum **50 % marks** (minimum **45 % marks**, in case of Backward class categories and Persons with Disability candidates belonging to Maharashtra State only) in **the subjects**

Physics, Mathematics and Chemistry/Biotechnology/Biology/ Technical Vocational subject added together.

AND

Obtained a **positive Composite score*** i.e., marks obtained after adding 50% of JEE (Main)2014 (Paper 1) marks and 50% of normalized Standard XII (Board or Equivalent Examination) marks in Physics, Chemistry and Mathematics.

**Note: -1) * - The details for calculating positive Composite score shall be notified separately.
2) Refer Rule No 2.11 regarding Rounding off of percentage of marks for deciding the eligibility, if applicable.**

2.2 Eligibility Criteria for All India Candidates:

Candidate should be an Indian National and should have passed the HSC (Std.XII) examination of Maharashtra State Board of Secondary and Higher Secondary Education or its equivalent examination with subjects English, Physics, Mathematics and Chemistry/Biotechnology /Biology/ Technical Vocational subject

AND

Secured minimum **50 % marks** (minimum **45 % marks**, in case of Backward class categories and Persons with Disability candidates belonging to Maharashtra State only) in **the subjects Physics, Mathematics and Chemistry/Biotechnology/Biology/ Technical Vocational subject added together.**

AND

Obtained All India Rank in JEE (Main) 2014 (Paper 1) given by CBSE

Note: 1) Maharashtra Candidates eligible as per rule 2.1 and 2.2 shall submit single Application and Option form for the CAP for both Maharashtra State Seats and All India Seats. Such candidates will be given best single allotment through CAP as per inter-se-merit.

2) Refer Rule No 2.11 regarding Rounding off of percentage of marks for deciding the eligibility, if applicable

2.3 Eligibility Criteria for Foreign National/PIO/Children of Indian workers in the Gulf countries/ Children of NRI

Candidate should have passed the HSC (Std.XII) examination of Maharashtra State Board of Secondary and Higher Secondary Education or its equivalent examination with subjects English, Physics, Mathematics and Chemistry/Biotechnology/Biology/ Technical Vocational subject

AND

Secured minimum **50 % marks** in **the subjects Physics, Mathematics and Chemistry/Biotechnology/Biology/ Technical Vocational subject added together.**

Note :-

- The eligibility of the candidates passing the HSC (Std. XII) or equivalent examination from a school/college/Examination Board situated outside India shall be further decided by the University Authorities to which the candidate is admitted. Hence such candidates are advised to get their eligibility verified by the respective University Authorities before seeking admission to the Engineering courses in the State of Maharashtra.

- Refer Rule No 2.11 regarding Rounding off of percentage of marks for deciding the eligibility, if applicable.

2.4 Eligibility criteria for GoI Nominees:

Candidate should be an Indian National and should have passed the HSC (Std.XII) examination of Maharashtra State Board of Secondary and Higher Secondary Education or its equivalent

examination with subjects English, Physics, Mathematics and Chemistry/Biotechnology /Biology/ Technical Vocational subject

AND

Secured minimum **50 % marks** (minimum **45 % marks**, in case of Backward class categories and Persons with Disability candidates of respective States) in the subjects **Physics, Mathematics and Chemistry/Biotechnology/Biology/ Technical Vocational subject** added together.

AND

Obtained All India Rank in JEE (Main) 2014 (Paper 1) given by CBSE

Note: -

Refer Rule No 2.11 regarding Rounding off of percentage of marks for deciding the eligibility, if applicable.
The candidate belonging to this type is required to appear for the JEE (Main) 2014 (Paper 1).

2.5 Eligibility criteria for J & K Migrant candidates:

Candidate should be an Indian National and should have passed the HSC (Std.XII) examination of Maharashtra State Board of Secondary and Higher Secondary Education or its equivalent examination with subjects English, Physics, Mathematics and Chemistry/Biotechnology /Biology/ Technical Vocational subject

AND

Secured minimum **50 % marks** in the subjects **Physics, Mathematics and Chemistry/Biotechnology/Biology/ Technical Vocational subject** added together.

AND

Obtained All India Rank in JEE (Main) 2014 (Paper 1) given by CBSE

Note: -

Refer Rule No 2.11 regarding Rounding off of percentage of marks for deciding the eligibility, if applicable.

equivalent) Examination, stating that the candidate's Mother tongue is Marathi as per the original School record.

- Candidate should have passed SSC or HSC (or equivalent) Examination with Marathi as one of the subject.
- **Composite Score of MKB Candidates shall be calculated in the manner similar as applied to Maharashtra state board students considering he /she has passed HSC from Maharashtra board.**
- **Composite Score of MKB Candidates shall be calculated by mapping his or her HSC performance with Maharashtra state board.**

2.7 Eligibility criteria for Candidates who are sons/daughters of Defence Service personnel:

In addition to the basic eligibility criterion mentioned in rule no.2.1, candidates who satisfying any one of the following criteria as are eligible to seek admission against seats for sons/daughters of defence service personnel.

- Candidate is a son/daughter of ex-service personnel who is domiciled in Maharashtra State (Def-1).
- Candidate is a son/daughter of active service personnel who is domiciled in Maharashtra State (Def-2).
- Candidate is a son/daughter of active service personnel (Def -3)
 - Who is transferred to Maharashtra State but is not domiciled in Maharashtra State
 - Who is not domiciled in Maharashtra State but his/her family is stationed in Maharashtra State under the provision of retention of family accommodation at the last duty station on the grounds of children's' education, provided further that, such candidate should have appeared and passed the HSC (Std.XII) examination of Maharashtra State Board of Secondary and Higher Secondary Education or its equivalent examination from a school/college situated in the State of Maharashtra.

Note: This provision is NOT available to the children of CIVILIAN STAFF who is working/ who has worked with the Indian Defence Services.

2.8 Eligibility criteria for Candidates who are Persons with Disability:

In addition to the basic qualification mentioned in rule no. 2.1, candidate who is suffering from any one of the following permanent disability is eligible to seek admission against seats for Persons with Disability candidates

- Candidate who is visually impaired (blind) candidate (type P1)
- Candidate who is speech & hearing impaired (deaf & dumb) candidate (type P2)
- Candidate who is with orthopedic disorders, learning disabilities, Dyslexia, Dyscalculia, Dysgraphica, Spastic (type P3)

Note: The certificate (Proforma F/F-1) should clearly state that the extent of disability is more than 40% and the disability is permanent in nature.

2.9 Other eligibility criteria for specialized branches of Engineering/Technology:

Candidates seeking admission to some special courses or under some special provisions have to fulfill the following additional eligibility criteria.

- **Admission to Mining Engineering course:**

Female candidates are not eligible for admission to Mining Engineering course.

2.10 Eligibility criteria of Candidates who have passed Diploma in Engineering/Technology and seeking admission to First Year of Engineering/Technology in Unaided Institutes:

Diploma holders should have passed the Diploma course in Engineering/Technology with minimum of 50% marks (45% marks in case of candidates of Backward class categories and Persons with Disability belonging only to Maharashtra State) and medium of instruction as English from the AICTE approved Diploma Institutes affiliated to State Boards of technical Education.

Note:

1. To resolve a tie i.e. more than one candidate securing equal aggregate marks in Final year of the Diploma examination, following order of preference shall be adopted: marks in Maths at SSC, Grand Total at SSC.
2. Eligible Diploma candidates (rule 2.10) shall be considered for Admission against the Institute level seats in **Unaided Private Institutes only**. The details of the admission process for filling seats are specified in Annexure-II.

2.11 Rounding off of percentage of marks for deciding eligibility for admission.

In case percentage, marks (converted out of 100) in the subjects **Physics, Mathematics and Chemistry/Biotechnology/Biology/ Technical Vocational subjects** added together at HSC (std.XII), comes in fraction then percentage of marks shall be rounded off as explained in the example for the purpose of deciding the eligibility of the candidate.

Example: - If the percentage of marks comes out to be 44.50% to 44.99% then it shall be rounded to 45% and if the percentage of marks comes out to be 44.01% to 44.49% shall be rounded to 44%.

General Notes:

1. In case the maximum marks in individual subject is other than 100, convert the marks out of 100 for individual subject but do not *round off* these marks. If the sum of the converted marks of three individual subjects without rounding off works out to be a figure with fraction then fraction up to two decimal places shall only be considered and the percentage of marks shall be calculated considering maximum marks as 300 and, If the percentage comes in fraction, rounding off shall be done as given in rule No. 2.11 to decide the eligibility.

Example: If a candidate obtains 85 marks out of 200 in Physics, 76 marks out of 150 in Chemistry and 40 Marks out of 100 in Mathematics, then the sum of marks obtained works out to be 201 out of 450 marks. If it is converted out of 300, it works out to be 134. The % of marks comes out 44.6666 %.

However if the marks in individual subjects are converted out of 100, then the marks are as 42.5 in Physics, 50.6666 in Chemistry and 40 in Mathematics. It means the sum of converted marks of individual subject is 133.1666, which is 133.16 up to two fractions. The % of marks comes out 44.38 % after rounding off it is 44%. Hence the candidate is not eligible for admission.

2. If **letter grades** are assigned instead of marks at SSC, HSC or its equivalent examination the candidate must obtain the certificate of conversion of letter of grades into marks from the competent authority where from the candidate has passed the examination. The candidate should produce such certificate at the time of submission of application form. The Eligibility shall be decided based on the equivalent marks submitted by such candidates.

Institute Level Seat and Vacant Seat.

Candidate passing the HSC (Std. XII) or its equivalent examination with subjects English, Physics, Chemistry and Mathematics and should have secured minimum 50% marks in General Category and reserve Category 45% marks in Physics, Chemistry and Mathematics added together.

Candidates passing Diploma in Engg. / Technology course from Maharashtra State:

Diploma holders who have passed the diploma course in Engineering/Technology with minimum of 50% marks and reserve Category 45% marks from the Polytechnics affiliated to MSBTE or AICTE approved autonomous Polytechnics in Maharashtra State.

B) Minimum level of acceptance, if any.

Eligibility criteria for Maharashtra State Candidate and Outside Maharashtra State Candidate-

Candidate should be an Indian National and should have passed the HSC (Std. XII) examination of Maharashtra State Board of Secondary and Higher Secondary Education or its equivalent examination with subjects English, Physics, Mathematics and Chemistry / Biotechnology / Biology / Technical Vocational subject

And

Secured minimum 45% marks (minimum 40% marks, in case of Backward class categories and Persons with Disability candidates belonging to Maharashtra State only) in the subjects

Soft Skill Development Facilities

The soft skill development facilities are provided at the college level through training and placement cell which is headed by Training and Placement Officer. Faculty members of each department are the member of the cell. They are provided with computer tools such as scanner, Internet etc.

The College has signed MOU with AON Consulting Private Limited, New Delhi, online assessment platform for verbal, technical and aptitude test for success in professional & personal life also the college is inducing Soft Skills, Technical Skills, Interpersonal Skills by arranging Short Term Training programs regularly for students.

The college is the member of the federation of the engineering colleges under Kavayitri Bahinabai Chaudhari North Maharashtra University, Jalgaon and the soft skills facilities are also provided at the federation level. The Training and Placement Cell caters to soft skill development in the following areas:

- a) Work ethic
- b) Courtesy
- c) Teamwork
- d) Self-discipline and self confidence
- e) Conformity to prevailing norms pertaining to dress, body language, tone of voice and vocabulary according to the particular culture of the given work place
- f) Language Proficiency and environmental awareness

Teaching Learning Process

Methodology

For effective teaching learning process good and adequate infrastructure facilities are available. The class rooms and labs / workshop are well lighted with natural light during day time with circulation of fresh air. Conventional methods is adopted where in black board, chalk and faculty are involved in teaching the students in conjunction with modern methods like charts, cut models, OHPS, LCD's , electronics media like e-books , educational CD's, VCD. TV's are adopted by the faculty . Course files for all the subject are available in each department. Each department is having a departmental library and computer lab connected with internet. The central library is computerized with Del Net facilities and has AC reference room in addition to a reading room and staff rooms.

A computer center having 40 terminals is independently available for the use of faculty and students. The computer center is provided with internet facility and is available both during working hours and in additional time also.

Effectiveness

To asses the effectiveness of learning process by the students, two class tests at each month end and an assignment week is conducted where in the students are given an assignment sheets in a period sometime during 5th and 6th week of the term as per notified schedule and the students who gets the maximum marks is given a book on subject as reward with intention of motivating him for better performance in forthcoming university examination. The answer papers are checked in time and are shown to students and are collected back for record duly signed by student concerned.

Internal continuous evaluation system is followed for evaluation of term work as per guidelines issued by the University.

Motivations and rewards

Gold medals are awarded by the Management who are University first position rank holder in branch of Chemical Engg., Production Engg., Computer Engg. and Electronics Engg. in the University convocation. The University toppers are also felicitated at the college level in the afternoon of University convocation day.

SYLLABUS STRUCTURE
For Affiliated Colleges
Semester – I & II
W.E.F. 2024 – 25

Objectives of the Program:

1. To provide a holistic and multidisciplinary technical education that develops all capacities of human beings – intellectual, aesthetic, social, physical, emotional, ethical, and moral – in an integrated manner.
2. To enrich students with new knowledge and skills to engage meaningfully in the emerging socio-economic transformation.
3. To prepare professionals in cutting-edge areas that are fast gaining prominence with important applications to health, environment, and sustainable living for enhancing employability of the youth.

Program Outcomes (POs) for an engineering graduate:

- i. **Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- ii. **Problem Analysis:** Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
- iii. **Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- iv. **Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions for complex problems.
- v. **Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
- vi. **The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- vii. **Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- viii. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- ix. **Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- x. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

- xi. **Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- xii. **Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and lifelong learning in the broadest context of technological change.

Under Bachelor's Engg./ Tech. Honours Degree in chosen Major Engg./ Tech. Discipline with Multidisciplinary Minor (Multidisciplinary and Honors, 180-194 credits), students would take up five-six additional courses of 18 to 20 credits in the same Engg./ Tech. discipline/ Emerging Areas Specialization distributed over semesters III to VIII. Students will have to compulsorily choose Honors from the same faculty / discipline.

Under Bachelor's Engg./ Tech. Degree in chosen Major Engg./ Tech. Discipline with Double Minor (Multidisciplinary and Specialization Minor, 180-194 credits), students would take up five-six additional courses of 18 to 20 credits in another Engg./ Tech. discipline/ Emerging Areas Specialization distributed over semesters III to VIII. Students will have to compulsorily choose Minor from other faculty / discipline.

Students will have the flexibility to enter a programme in odd semesters and exit a programme after the successful completion of even semesters as per their future career needs. Students exiting will be awarded provided they secure additional EIGHT credits in skill-based vocational courses.

The credit structure for different levels under the Four-year Bachelor's Multidisciplinary Engineering UG Programme with multiple entry and multiple exit options are as given below:

Level	Qualification Title	Credit Requirements	Semester	Year
4.5	One Year UG Certificate in Engg./ Tech.	42	2	1
5.0	Two Years UG Diploma in Engg./ Tech.	84	4	2
5.5	Three Years Bachelor's Degree in Vocation (B. Voc.) or B. Sc. (Engg./ Tech.)	126	6	3
6.0	4-Years Bachelor's degree (B.E./ B.Tech. or Equivalent) in Engg./ Tech. with Multidisciplinary Minor	168	8	4

ENGINEERING PHYSICS				
COURSE OUTLINE				
Course Title:	ENGINEERING PHYSICS	Short Title:	PHY	Course Code:
Course description: Explore laws, forces, and matter properties while studying the motion of charges in electric and magnetic fields. Hands-on demonstrations reinforce theoretical concepts, enhancing problem-solving skills and preparing students for diverse industry opportunities. Gain practical insights and unlock a world of career possibilities in this dynamic physics course.				
	Hours/week	No. of weeks	Total hours	Semester credits
Theory	03	14	42	04
Practical	02	14	28	
Prerequisite course(s): Mathematics course with vector calculus				
Course objectives: The objective of this course is to: 1. Cultivate practical problem-solving abilities in real-world physics scenario. 2. Foster critical thinking for analytical evaluation of complex phenomena. 3. Promote interdisciplinary thinking by integrating varied physics concepts.				
Course outcomes: After successful completion of this course the student will be able to: 1. Demonstrate deep comprehension of diverse physics principles and applications. 2. Exhibit advanced proficiency in solving diverse physics problems. 3. Critical analysis of experimental data, literature, and theoretical models. 4. Apply integrated physics knowledge to solve real-world challenges effectively. 5. Communicate scientific ideas persuasively through clear reports and presentations.

Optics, X-ray and Laser Interference, Diffraction and Polarization (comparative study) Principle of optical fiber, acceptance angle, acceptance cone, numerical aperture, Numerical. Continuous & Characteristics Spectrum of X-ray, Bragg's law, X-ray diffraction, Properties & Applications of X-Rays, Numerical. Principle of laser, Properties of laser beams: Types of laser – He-Ne laser				
Unit-II:	No. of Lectures: 08 Hours		Marks: 12	
Introduction to Mechanics & Acoustics Scalars and vectors properties, Newton's laws and its completeness in describing particle motion, Conservative and non-conservative forces, Central forces, Keplers law without derivation, Ultrasonic waves, Production of Ultrasonic wave by Magnetostriction & Piezoelectric Method, Properties & Applications of Ultrasonic wave.				
Unit-III:	No. of Lectures: 08 Hours		Marks: 12	
Quantum Mechanics & Nanoscience				

Matter waves, Properties of Matter wave, De-Broglie hypothesis, Heisenberg's Uncertainty principle, Schrödinger Time dependent and Time independent wave equation. Nano particle, Top down & Bottom-up approach, Properties of Nano particles, Synthesis of Nanoparticles (Physical, Chemical & Hybrid)		
Unit-IV:	No. of Lectures: 09 Hours	Marks: 12
Magnetic Materials, Semiconductors and Superconductors		
Magnetic Materials (Comparative study), B-H Curve, Types of Semiconductors, Conductivity in semiconductor, Hall effect, Numerical, Superconductivity, Properties of Superconductor, Meissner effect, Types of superconductors, applications.		
Unit-V:	No. of Lectures: 09 Hours	Marks: 12
Electromagnetic Theory		
Divergence, Curl and Gradient, Electric flux, Gauss Law, Calculation of electric field, Poisson's & Laplace equation and Calculation of electrostatic potential for a charge distribution, Biot-Savarts Law, Amperes Law, Faradays Law, Lenz Law for Electromagnetic equations, Applications of Classical Mechanics, Quantum Mechanics & Electrodynamics with Python.

ENGINEERING CHEMISTRY				
COURSE OUT LINE				
Course Title:	ENGINEERING CHEMISTRY	Short Title: CHY	Course Code:	
Course description:				
This course is aimed at introducing the fundamentals of basic sciences (Chemistry) to under graduate students. The background expected includes a prior knowledge of chemistry from HSC (science) and familiarity with basic fundamental theories. The goals of the course are to understand the basic Principles of Chemistry and their applications in different branches of engineering.				
	Hours/week	No. of weeks	Total hours	Semester credits
Theory	03	14	42	04
Practical	02	14	28	
Prerequisite course(s):				
11 th & 12 th Chemistry				
Course objectives:				
<ol style="list-style-type: none"> 1. To learn the significance of water treatment and different methods of softening hard water 2. The participants acquire knowledge about the applications of electrochemistry in the fields of fuel cells, batteries, electrolytic processes and electrochemical corrosion & spectroscopy. 3. To impart the awareness of various fuels 4. This course aims to provide a good platform to engineering students to understand, model and appreciate concept of thermodynamics. 5. To enhance the overall awareness of the synthesis, properties & applications of various polymers 				
Course outcomes:				
After successful completion of this course the student will be able to:				
<ol style="list-style-type: none"> 1. Apply the different methodologies for analysis of water and techniques involved in softening of water as commodity. 2. Acquire the knowledge of electrodes in electrochemical cells, migration of ions, liquid junction potential and conductometric titrations 3. Acquire the knowledge of conventional and alternative fuels with respect to their properties and applications. 4. Identify and formulate fundamentals laws of thermodynamics. 5. Understand structure, properties and applications of polymers and nano material.

ENGINEERING CHEMISTRY		Semester:	I or II	
Teaching Scheme:		Examination scheme		
Lectures:	3 hours/week	End semester exam (ESE):	60 marks	
		Duration of ESE:	03 hours	
		Internal Sessional Exam (ISE):	40 marks	
Unit-I:	No. of Lectures: 08 Hours	Marks: 12		
Water Technology				
Impurities in water, hardness of water, its types, Units and numerical on hardness determination. Determination of hardness by EDTA, alkalinity, effects of hard water in boiler - priming and foaming, boiler corrosion, caustic embrittlement, scale and sludge. Water treatment: i) Zeolite method ii) Demineralization method.				
Unit-II:	No. of Lectures: 08 Hours	Marks: 12		
Electrochemistry				

Introduction: Electric conduction, types of conductors, Metallic conduction: Electrolytic or ionic conduction, Electrolytes & their classification, Electrical conductance of solution, Conductivity Cell & Cell constant, Types of electrochemical cells, Salt bridge & its function, Cell potential, Introduction of spectroscopy and its applications, introduction UV, IR & NMR, fluorescence & its applications, applications of MRI.		
Unit-III:	No. of Lectures: 09 Hours	Marks: 12
Fuels		
Introduction (definition, classification of fuel. characteristics of an ideal fuels. Calorific value (CV): Higher calorific value (HCV) and Lower calorific value (LCV), Determination of Calorific value by Bomb calorimeter and Boy's gas calorimeter and numerical, Solid fuel: Coal: Analysis of Coal-Proximate and Ultimate analysis. Liquid fuel: Petroleum: Refining of petroleum /crude oil and composition, boiling range Gaseous fuel: Composition, properties and applications of CNG. Alternative fuels: Power alcohol and biodiesel.		
Unit-IV:	No. of Lectures: 09 Hours	Marks: 12
Thermodynamics		
Introduction: Terms used in thermodynamics, System and surrounding, Extensive property & Intensive property, Process and its types, Expression for pressure-volume (PV) work, Expression for the maximum work: first law of thermodynamics & its limitations, spontaneous and non-spontaneous process with examples, Statements of second law of thermodynamics, Definition of Entropy, Statement of third law of thermodynamics, its applications.		
Unit-V:	No. of Lectures: 08 Hours	Marks: 12
Polymers		
Introduction, Classification of polymers, Mechanism of addition polymerization by free radical method. Preparation, properties & applications of – Polyethylene, Polystyrene, PVC, Nylon 66, Teflon. Synthetic Rubber – preparation, properties & applications of Styrene butadiene rubber (SBR), Nitrile rubber, Butyl rubber.

Theory	3	14	42	4	
Tutorial	1	14	14		
Prerequisite course(s): 11 th & 12 th mathematics					
Course objectives:					
The objective of this course is to familiarize the prospective engineers with techniques in calculus, linear algebra and statistics and probability. It aims to equip the students with standard concepts and tools at an intermediate to advanced level that will serve them well towards tackling more advanced level of mathematics and applications that they would find useful in their discipline					
Course outcomes:					
After successful completion of this course the student will be able to:					
<ol style="list-style-type: none"> 1. Deal with functions of several variables that are essential in most branches of Engineering. The essential tool of matrices and linear algebra in a comprehensive manner. 2. Apply differential and integral calculus. Apart from some other applications they will have a basic understanding of Beta and Gamma functions. 3. Understand basic concept of statistics, probability distribution. Apply statistical methods for analyzing experimental data. 4. To learn approach for modeling the relationship in two variables. 5. To understand the basic concept of partial differentiation and apply it to solve in engineering problems

BASIC ELECTRICAL AND ELECTRONICS ENGINEERING				
COURSE OUTLINE				
Course Title:	Basic Electrical and Electronics Engineering	Short Title:	BEEE	Course Code:
Course description:				
This course provides an introduction to electrical and electronics engineering which includes response of electrical circuits to DC as well as AC, semiconductor devices such as diodes, transistors, logic gates and Number Systems.				
	Hours/week	No. of weeks	Total hours	Semester credits
Theory	03	14	42	04
Practical	02	14	28	
Prerequisite course(s):				
11 th & 12 th Physics				
Course objectives:				
<ol style="list-style-type: none"> 1. To explain basic laws and theorems of electrical networks 2. To explain fundamentals of alternating current circuits. 3. To explain students the essential basics of Magnetic Circuits and PN Junction Diode. 4. To explain the concepts and terminology of transistors. 5. To explain logic gates & Number conversion Systems. 				
Course outcomes:				
After successful completion of this course the student will be able to:				
<ol style="list-style-type: none"> 1. Demonstrate & develop basics of DC analysis of electrical circuits using circuit simplification techniques. 2. Demonstrate & develop basics of AC analysis of electrical circuits using series combination of R, L & C. 3. Develop basic principles of magnetic circuits & Semiconductor Diodes. 4. Demonstrate & develop basic configurations of Transistors. 5. Demonstrate different Logic gates and Conversion between the Number Systems

DC Circuit:				
Ohms Law, Kirchhoff's laws, Node voltage and Mesh current analysis, Series and Parallel circuit, Current and Voltage division rule, Delta -Star and Star-Delta conversion, Thevenin's Theorem, Superposition Theorem, Maximum Power Transfer Theorem. (Numerical Expected on above topics)				
Unit-II:		No. of Lectures: 09 Hours		Marks: 12
AC Circuit:				

Single phase AC Circuits: Concept of single-phase supply, Terms related with A.C. quantities, complex and phasor representation of AC quantities, Analysis of single-phase ac circuits consisting of R, L, C, RL, RC series combinations (Numerical expected). Three phase AC Circuit: Concept of Three phase supply, Relation of voltage and current in three phase circuit.		
Unit–III:	No. of Lectures: 08 Hours	Marks: 12
Magnetic Circuit & PN Junction Diode:		
Electromagnetic Induction: Faraday's laws, Lenz's Law, statically and dynamically induced EMF (Numerical should not be asked) Self and Mutual inductance, Terms related with magnetic circuits (Numerical should not be asked) Composite Magnetic Circuit,		
PN Junction Diode: V-I Characteristics, Junction break down, Diode current equation, & diode resistances, Temperature dependency of PN Junction Diode, LED working, Photo diode working.		
Unit–IV:	No. of Lectures: 08 Hours	Marks: 12
Transistors:		
Bipolar Junction Transistors: Bipolar Junction Transistor (BJT): CB, CE and CC Configurations, DC current gains and their relations (Numerical may be asked) different regions of operations, CE & CB Characteristics, Need of biasing, Voltage Divider Biasing, BJT as an Amplifier.		
Field Effect Transistor: Classification, working and V-I Characteristics of JFET, Parameters of FET and Difference between BJT & JFET.		
Unit–V:	No. of Lectures: 08 Hours	Marks: 12
Logic Gates & Number System:		
Number System (Decimal, Binary, Octal, Hexadecimal) & their Conversions, Basic and Universal Logic gates, Boolean Algebra, De-Morgans theorem, Simplification and Implementation of logic equations.

ENGINEERING GRAPHICS				
COURSE OUTLINE				
Course Title:	Engineering Graphics	Short Title:	EG	Course Code:
Course description:				
Engineering Graphics is the language of engineers. This course provides a strong foundation in the creation, interpretation, and communication of engineering drawings and diagrams. This preliminary course aims at building a foundation for the further course in drawing and other allied subjects. This subject is useful in developing drafting and sketching skills of students. Through a combination of theoretical learning and hands-on exercises, students will develop the skills necessary to visually represent complex engineering concepts and designs accurately.				
	Hours/week	No. of weeks	Total hours	Semester credits
Theory	03	14	42	04
Practical	02	14	28	
Prerequisite course(s):				
Basic reasoning skill, Concept of geometry and Basic drafting skills				
Course objectives:				
The objective of this course is to:				
<ol style="list-style-type: none"> 1. To understand techniques of drawings in various fields of engineering. 2. Learn basic engineering drawing formats. 3. To improve imagination skills. 4. Ability to convey complex technical information through drawings and annotations effectively. 				
Course outcomes:				
After successful completion of this course the student will be able to:				
<ol style="list-style-type: none"> 1. Apply the concept of industry-standard drawing practices, including line types, symbols, and conventions used in engineering drawings. 2. Correlate the concept of projection of points, straight lines and planes. 3. Acquire visualization skills, which involve creating multiple views of an object to represent it accurately in two dimensions. 4. Illustrate the concept of isometric and 3D drawings to represent objects in a more realistic and visually informative manner. 5. Demonstrate and analyze the understanding of the development of surfaces of different types.

PROGRAMMING FOR PROBLEM SOLVING				
COURSE OUTLINE				
Course Title:	Programming for Problem Solving	Short Title:	PPS	Course Code:
Course description:				
This course provides students with a comprehensive study of the C programming language. This course focuses on introduction to program design and problem solving using the C programming language. Programming topics include control structures, functions, arrays, pointers, and file I/O.				
	Hours/week	No. of weeks	Total hours	Semester credits
Theory	03	14	42	04
Practical	02	14	28	
Prerequisite course(s):				
Basic Mathematical Concepts, Fundamental Logical Thinking, Basic Quantitative and Logical Aptitude				
Course objectives:				
The objective of this course is to impart knowledge so that the student will:				
<ol style="list-style-type: none"> 1. Learn the fundamentals, structure and syntax of C Language. 2. Apply the concepts of C language to solve logical problems. 3. Apply code reusability with functions and pointers. 4. Demonstrate the sequence of the program and give logical outputs. 5. Construct the program using loops and operators to solve problems. 				
Course outcomes:				
After successful completion of this course the student will be able to:				
<ol style="list-style-type: none"> 1. To develop effective algorithms to solve arithmetic and logical problems 2. To design the code using decision making statements and loop to solve the problem. 3. To analyze the given problem and construct small modules from it. 4. To design program based on concept of array and string 5. To construct the structure for application having data of different data types

Programming for Problem Solving Lab		Semester:	I
Teaching Scheme:		Examination scheme	
Practical:	2 hours/week	End semester exam (ESE) UA: PR	25 marks
		Internal Continuous Assessment (ICA) CA:	25 marks
End Semester Exam (ESE) Pattern:		Practical (PR)	
Concerned faculty member should suitably frame EIGHT laboratory assignments in C Language from the following list.			
<ol style="list-style-type: none"> Construct the program to accept an integer from user and identify whether the given number is Prime number/Armstrong Number/Palindrome number. Identify the number of days in a month using switch case. Develop the code for conversion of Binary number to Decimal number Determine whether a given year is a leap year or a century year. 			

5. Compute the roots of a quadratic equation by accepting the coefficients. Print appropriate messages.
6. Illustrate the concept of loops to compute sum of series.
7. Create a code to read n positive integer and Construct right angled triangle of asterisk (*) of n layers.
8. Apply the call by reference method of function to swap the values of two numbers.
9. Compose program for accepting string and reverse it without using library functions. Display the original and reversed string.
10. Construct functions to implement string operations such as compare, concatenate, string length. Convince the parameter passing techniques.
11. Calculate the sum of all even numbers and all odd numbers in the array and print the larger sum.
12. Develop matrix multiplication program and validate the rules of multiplication.
13. Create a structure to store employee number, Name, Department and Basic salary. Create an array of structure to accept and display the value of 10 employees.

Guide lines for ICA:

Students must submit ICA in the form of journal. Each assignment should be well documented. Faculty in charge will assess the assignments continuously and grade or mark each assignment on completion date declared for each assignment.

Guidelines for ESE:

ESE will be based on the laboratory assignments submitted by the students in the form of journal. In ESE the student may be asked to perform any one practical. Evaluation will be based on paper work and performance in the practical.

WORKSHOP PRACTICES LAB				
LAB COURSE OUTLINE				
Course Title:	Workshop Practices Lab	Short Title:	WPL	Course Code:
Course description:				
<p>Workshop practice is the backbone of the real industrial environment which helps to develop and enhance relevant technical hand skills required by the technician working in the various engineering industries and workshops. This course intends to impart basic know-how of various hand tools and their use in different sections of manufacturing.</p> <p>Irrespective of branch, the use of workshop practices in day to day industrial as well domestic life helps to dissolve the problems.</p>				
Practical	Hours/week	No. of weeks	Total hours	Semester credits

11th Physics, 12th Physics				
Course objectives:				
<p>The objective of this course is to:</p> <ol style="list-style-type: none"> 1. To provide exposure to the students with hands on experience on various basic engineering practices in Automobile & Mechanical Engineering 2. To provide exposure to the students with hands on experience on various basic engineering practices in Civil Engineering. 3. To provide exposure to the students with hands on experience on various basic engineering practices in Computer Engineering. 4. To provide exposure to the students with hands on experience on various basic engineering practices in Electrical & Electronics Engineering. 5. To develop skills through hands on experience. 				
Course outcomes:				
Upon successful completion of lab Course, student will be able to:				
<ol style="list-style-type: none"> 1. Interpret the traffic signs and symbols and perform emergency maintenance of 2/4 wheeler. 2. Examine and troubleshoot various electrical and electronics components. 3. Prepare components using workshop trades including fitting, carpentry, black smithy, metal joining and lathe shop. 4. Organize the various construction activities at site. 5. Appraise the safety practices on the shop floor.

Teaching Scheme:		Examination scheme		
Practical:	2 hours/week	End semester exam (ESE) UA: OR		25 marks
		Internal Continuous Assessment (ICA) CA:		25 marks
<p>Concerned faculty member should suitably frame EIGHT laboratory assignments from the list given below as per the following.</p> <ol style="list-style-type: none"> I. Any four groups out of following six groups. II. Any two experiments form each chosen groups. 				

GROUP - A

1. Analyze a given set of traffic signs and signals and road markings to determine their implications for safe driving.
2. Create a step-by-step guide or manual for wheel removal and replacement, including illustrations or diagrams.
3. Develop a maintenance schedule for gear oil checks and replacements based on the vehicle's usage and manufacturer recommendations and check the level of gear oil in engine of Car.
4. Inspect Carburetor/Fuel injector/Spark plug of motorcycle / scooter.
5. Safety at work place.

GROUP - B

1. Assemble a pipe line as per given drawing using pipes of one inch diameter, pipes of half inch diameter, nipple, reducer, union, valves T, elbow and then disassemble this pipe line.
2. Measure the level difference between any two points.
3. Appraise the area of a built-up space using measuring tape.
4. Analyze the readings and measurements obtained from the water pipe technique to verify that they meet the required specifications.
5. Safety at work place.

GROUP - C

1. Create a detailed maintenance checklist or guide for identifying, cleaning, and assembling computer components, including step-by-step instructions and safety precautions and perform the assembly of components in computer / laptop.
2. Manage a hard disk by performing actions such as partitioning, formatting, and file management.
3. Examine and Install Operating System and essential software.
4. Set up connection of nearby devices & internet in computer / laptop / mobile.
5. Safety at work place.

GROUP - D

1. Create a safety guide or checklist for identifying and connecting phase, neutral, and earth wires in domestic electrical installations, emphasizing best practices and safety measures and perform connection to three pin plugs.
2. Design and making of extension board
3. Create a comprehensive earthing design plan and Practice on installation of earthing system and testing of earthing system.
4. Assess the quality of maintenance work performed and the responsiveness to equipment issues, providing recommendations for improvements or replacements when necessary. (tube light, fans, inverter, battery, etc.)
5. Safety at work place.

GROUP - E

1. Design a simple electronic circuit.

2. Apply knowledge of de-soldering techniques to remove and replace components on an electronics circuit.
3. Demonstrate the correct procedure for testing electronic components using appropriate testing equipment
4. Apply knowledge of sensor functionality to design and configure sensor systems for diverse purposes.
5. Safety at work place.

GROUP - F

1. Develop a male female fitting job with drilling and tapping in Fitting Shop & Practice Cross Half lap joint, Half lap Dovetail joint and Mortise Tenon Joint in carpentry shop.
2. Create an S-hook from a given round rod, by hand forging operation.
3. Prepare a single V butt joint and lap joint of mild steel using arc welding.
4. Develop a component using facing, plane turning, step turning, taper turning, knurling and parting on lathe machine.
5. Safety at work place.

INDIAN KNOWLEDGE SYSTEM				
COURSE OUTLINE				
Course Title:	Indian Knowledge System	Short Title:	IKS	Course Code:
Course description:				
<p>India is a nation with a long civilizational history. It has discovered enormous knowledge cutting across various dimensions of human life and existence. Today, though India is known for its achievement in Yoga and other spiritual studies, it has made enormous progress in the material life as well. From metallurgy to civil engineering, pre-modern Indians can boast of tremendous achievements. The fact that many of their engineering marvels have survived the test of time is a testament to their knowledge and skill. Such achievements also assume significant advances in certain basic sciences like Mathematics.</p> <p>A technical student must have an introductory background of this knowledge.</p>				
	Hours/week	No. of weeks	Total hours	Semester credits
Theory	1	14	14	2
Practical	2	14	28	
Prerequisite course(s):				
Course objectives:				
<ol style="list-style-type: none"> 1. A student of engineering must be aware of the knowledge system prevailed in ancient time to develop a self – pride. 2. The students should know the relevance of traditional knowledge in modern times. 3. Students studying IKS can develop analytical skills and learn to approach problems from diverse perspectives, fostering creativity and scholarly agility. 4. Studying IKS as part of modern education can foster interdisciplinary research resulting in a harmonious blend of various knowledge systems 5. The main objective of drawing from our past and integrating the Indian Knowledge Systems is to ensure that our ancient systems of knowledge represented by unbroken tradition of knowledge transmission and providing a unique perspective (Bhāratīya Drishti) is used to solve the current and emerging challenges of India and world. 				
Course outcomes:				
After successful completion of this course the student will be able:				
<ol style="list-style-type: none"> 1. To be able to appraise the basic idea about IKS and ancient scripture, 2. To demonstrate an ability in ancient mathematical approaches and astronomy. 3. To be able to recognize and describe the ancient Indian industrial engineering. 4. To have an ability to experiment with ancient Indian architecture and its relevance today. 5. To be able to relate the evolution and development of languages in India in today’s context.

<p>Students should choose any TWO modules from the following and should be clustered based on chosen module. Institute should provide faculty mentor for every cluster to facilitate students to learn / upskill / sharpen / practice on chosen module. Students may also take help of experts, faculty members and others to enhance their skills. Faculty mentors should conduct weekly meeting of their students to monitor their progress.</p> <p>Module – 1: Yoga and Positive Psychology for Managing Career and Life (10 hrs.) Yoga is known to enhance flexibility, strength and coordination. Apart from enhancing muscle flexibility and strength, yoga can also help with weight loss and improve body posture. Regular Yoga practice has also been associated with optimizing body functions like respiration, heart rate, lowering of blood pressure, keeping cardiovascular health problems at bay and more.</p>				

Today obesity has become a potent problem on account of the increase in consumption of junk food and a sedentary lifestyle. Yoga helps student counter these adverse effects and lead a healthy and energetic. The need and importance of yoga in education also follows from the fact that it helps in improving concentration and attention span. With yoga helping to improve memory function, its direct impact can also be seen in the student's academic performance.

Topics:

Importance of yoga, yogic perspective of Health and Wellbeing, Diseases in yogic perspective, Managing mind, self-realization – the ultimate joy, How yoga helps in equanimity of mind, seven stages of wisdom, yoga for balancing Emotions and cognitions, Pranayama, What is our real nature, How mind works, Journey of positive psychology, Difference in good life and life satisfaction, Why yoga with positive psychology, Fundamental questions in positive psychology, What positive psychology is not, positive negative dialects of well-being, obstacles in wellbeing, positive psychology: second wave, Present context of professional work, Link between self-management and career management.

Module – 2: Food, Nutrition and Hygiene (10 hrs.)

Food and Nutrition deals with the processing and preservation food as well as consumption of balanced diet by individual. Nutritional Science has its roots in life sciences; it encompasses both biological and social sciences. Nutrition plays a major role in enhancing the quality of life through improved physical growth, immune-competence and enhancing productivity with improved health. Social, economic and cultural factors influence food consumption pattern and thus nutrition status of the individual. Further, Changes in nutrient composition during food processing and storage also needed to be studied.

Topics:

Introduction to nutrition and health, Relation between food, nutrition and health, Digestion and absorption of nutrients, recommended diet, carbohydrate Nutrients and their role, Fiber, Protein, fat and fat soluble vitamins, Water soluble vitamins, Meal planning, Nutritional Disorder, balance diet and food groups, Practical aspects of food selection, Sanitization and therapeutic nutrition, Food sanitation and hygiene, Water purification, Principles of therapeutic diet, Diet during fever, Diet during various diseases.

Module – 3: Stress Management (10 hrs.)

The goal of stress management is to control an individual's level of stress, particularly chronic stress, usually with the intention of enhancing daily functioning. It encompasses a broad range of approaches and psychotherapies. Many mental and physical signs of stress arise, and they differ depending on the circumstances surrounding each person. A deterioration in physical health, such as depression and headaches, chest pain, exhaustion, and sleep issues, can be among them. One of the secrets to a successful and happy existence in contemporary culture is stress management. Stress management offers several strategies to control anxiety and preserve

general wellbeing, yet life frequently presents a plethora of expectations that can be challenging to meet.

Topics:

What is stress, Sources of stress, Types of stress, Personality factors and stress, Stress and college students, Stress and nervous system, Hypothalamic Pituitary Adrenal (HPA) Axis, Effect of stress on immune system, Health risks associated with chronic stress, Stress and major Psychiatric disorder, Understanding your stress level, Role of personality pattern, Self-esteem, Locus of control, Role of thought beliefs and emotions, Situation Intrapersonal, Developing Cognitive coping skill, Autogenic training, Imaginary and progressive relaxation, Other relaxation techniques, Exercise and health

Module – 4: Group Dynamics (10 hr)

Groups are important for organizational life. Managers spend substantial time in managing groups and teams so that groups contribute to organizational and group goals. How effectively a manager plans, organizes, staffs, leads and controls depends upon how effectively he manages the groups. Group dynamics studies the nature, formation and reasons for forming the groups. It studies how groups affect the behavior and attitude of members and the organization. It is a process by which people interact with each other. If groups are effectively managed, they contribute a lot to organizational goals.

Topics:

Introduction of groups, Groups Dynamics: Definition, Meaning, Concept and Importance of Group Dynamics Group processes, Interpersonal attraction and Cohesion in Group Dynamics, Social relationship, Group Communication, Role of Communication in Group Dynamics, Interactive behaviour, Group leadership, Organizational justice, ethics and corporate social responsibility.

Module – 5: Body Language and Behavior (10 hr)

Body language is the use of physical behavior, expressions, and mannerisms to communicate nonverbally, often done instinctively rather than consciously. When we interact with others, we are continuously giving and receiving wordless signals. Micro expressions (brief displays of emotion on the face), hand gestures, posture, smile, hand movement, finger movement, and movement of feet and legs all register in the human brain almost immediately, even when a person is not consciously aware they have perceived anything.

Topics:

Defining Body language, Scope and relevance, Defining proxemics, Four Zones, Behavioural connotations, Oculistics: Use of eye communication, Haptic: Language of touch, Kinesics: Body

Motion and Gesture, Facial expression, Macro and Micro Facial Expressions, Mouth and smiles, Cultural differences in smile, hand and feet movement, finger movement, Paralanguage, Chromatics, Digital Body language, Gustorics and silence.

Module – 6: Sports and Fitness

Any out door or indoor sports, rules pertaining to the sport, fitness and exercises pertaining to the sport, psychological factors pertaining to the sport, injury management pertaining to the sport. Focus on improvement of various components of physique and skills related to fitness like strength, speed, coordination, endurance and flexibility; acquisition of sports skills, basic movement skills relevant to the sport; improvement of tactical ability; and improvement of mental abilities.

Module – 7: Cultural Activities

Practicing and participating any music, art, handicraft and cultural activities

Module – 8: Hobby Skilling

Building and upskilling any Social Hobbies, Physical & Health Hobbies, Creating & Creative hobbies etc.

Module – 9: NSS/NCC

Enrolling and Participating in NSS / NCC activities

Module – 10: Publication and Presentation

Publication of articles in newspapers, magazines etc. OR Submission / Publication of innovation ideas in conferences / workshops / journals / recognized forum etc.

Module 11: Environmental Sustainability

Environmental issues are one of the primary causes of disease, health issues and long-term livelihood impact. Major environmental issues that India and this region face today are Air pollution, poor management of waste, growing water scarcity, falling groundwater tables, water pollution, preservation and quality of forests, biodiversity loss, and land/soil, environmental degradation, public health, loss of resilience in ecosystems, livelihood security etc. The major sources of pollution that mandates action plan for Air Quality Management Waste Management and Water Quality Management.

More precisely plastic waste has been a major concern. The plastic waste is responsible for greenhouse gas emissions, end up in water bodies and make up debris in sea and river, species have been impacted by plastic debris, soil contamination and leaching of toxic chemicals into the ground, causing air pollution, and ultimately into food chain and public health.

Any participation / activity towards Environmental Sustainability as an individual or team with or without support of any agencies / NGOs / voluntary bodies may be carried out. The activities include survey and analysis, management and action plan, methodology and technical solution, standard operating procedure, detailed project report (DPR), public awareness campaign, sampling and segregation, collection and disposal etc.

Guide lines for ICA:

Students must submit ICA in the form of journal. Each should be well documented. Faculty in charge will assess the assignments continuously and grade or mark each on completion date declared for each.

The assessment for the same should be based on the following.

1. Pre and Post assessment for each module to judge the level of understanding / improvement. (55%)
2. Contribution as an individual, or as a member or leader in diverse teams. (15%)
3. Communication skill through presentation / report / publications etc. (15%)
4. Participation in events / activities / awareness program or development of model / poster / video / e-content / blog etc. (15%)

A three-member panel of faculty members including faculty mentor will assess and grade or mark at mid of semester and end of semester.

Theory	03	14	42	4	
Tutorial	01	14	14		
Prerequisite course(s): 11 th & 12 th mathematics					
Course objectives:					
The objective of this course is to familiarize the prospective engineers with techniques in numerical methods, sampling, ordinary differential equation and complex variables. It aims to equip the students to deal with advanced level of mathematics and applications that would be essential for their disciplines					
Course outcomes:					
After successful completion of this course the student will be able to:					
<ol style="list-style-type: none"> 1. Apply effective mathematical tools for the solutions of differential equations that model physical processes. 2. Introduce the solution methodologies for Laplace transform with applications in engineering. 3. Understand basic concept of test of significance and apply it to find solutions in engineering field. 4. Find numerical values of differentiations and integrations using various numerical methods. 5. Understand concept of Complex number and apply it to find solutions in engineering field.

LIBERAL LEARNING COURSE				
COURSE OUTLINE				
Course Title:	Liberal Learning Course	Short Title:	LLC	Course Code:
Course description:				
<p>Liberal learning is “self-learning in self-chosen liberal areas with self-defined scope”. The Liberal learning provides the higher levels of learning, as per learning pyramid, similar to learning through teaching others. Liberal learning broadens students’ perspectives and helps them develop as individuals and members of an inclusive society in which their technical skills and services are used. This course mainly helps students on building diverse knowledge base and scaling new real life professional challenges. The course includes activities that enable students think independently and develop broad academic and intellectual abilities.</p>

Course objectives:				
<p>The primary objective of the course is to inculcate a lifelong learning process that allows students to extend their knowledge horizons beyond engineering and make them better learners. The course objectives also include functioning in multidisciplinary teams, understanding the impact of engineering solutions in global and societal contexts.</p>				
Course outcomes:				
After successful completion of this course the student will be able to:				
<ol style="list-style-type: none"> 1. Create opportunities to experiment different learning styles and bring in the required balance. 2. Explore insights from many different perspectives of professional challenges.

<p>Unlike a standard course, this course does not have a defined syllabus, identified text or reference books, classroom lectures, and standard examinations. Students define their own syllabus, search for learning resources, study them to develop their own viewpoints and find appropriate ways to share learning with peers.</p>				
<p>Students should identify a self-chosen area / sub-area in engineering, non-engineering or societal issues and should be clustered based on chosen area / sub-area. Institute should provide faculty mentor for every cluster to facilitate students to outline their title of study, purpose of study and corresponding focus questions. Students may also take help of experts,</p>				

faculty members and others to enhance their focus questions. Students should carry out their study focusing on the questions and develop their own viewpoint. Faculty mentors should conduct weekly meeting of their students to monitor their progress.

Preferably, the outcome of the study should be in the form of prototype, model, poster, project or Do It Yourself (DIY) promoting ideation and innovation in the chosen area / sub-area.

Students may also join week end Internship outside the campus to study and develop their viewpoints on the focused questions.

Guide lines for ICA:

Students must submit ICA in the form of report. The report format may be according to the chosen area / sub-area.

The assessment for the same should be based on the following.

- a) Novelty, Relevance, Reasoning, Process of choice of topic: 5%
- b) Comprehensiveness and diversity of the gathered information for the study: 25%
- c) Originality of the viewpoints, Value of the viewpoints: 30%
- d) Methods of sharing, effectiveness of the sharing through presentation or any other mode: 30%
- e) Development plan and result of the plan as a learner: 10%

A three-member panel of faculty members including faculty mentor will assess and grade or mark at mid of semester and end of semester.

EXIT COURSE

Internship / Apprenticeship:

Internship / Apprenticeship / OJT shall be corresponding to the programme (Major) subject. Internship / Apprenticeship / OJT shall be monitored jointly by faculty and Industry / organization mentor.

The role of a Mentor, nominated by institute, shall be to provide professional/research guidance to the student during the internship. They shall also facilitate networking with other subject matter experts/professionals, which will enhance the internship experience and learning of the students.

Internship / Apprenticeship / OJT corresponding to the programme (Major) subject in Exit course with an external organization / entity is desirable. External organization may be industries, research institutions, University research centers or CSIR laboratories. Internship / Apprenticeship / OJT shall be preferably in offline mode, however online mode may also be permitted.

Preferably the Mini Project in Exit course shall be based on Internship / Apprenticeship / OJT.

Activities under Internship / Apprenticeship / OJT include Project work, Seminar, Industrial Training (excluding credits for Advanced Courses). This can be Industrial /

Govt. / NGO/MSME/ Rural Internship/ Innovation / Entrepreneurship / academic / industry research project.

After completion of Internship, students shall prepare a comprehensive report highlighting their learnings and takeaways during the internship period. The students are mandated to give a seminar based on the internship undertaken before an expert committee constituted by the concerned department and the assessment of internship shall be based on the following criteria:

- 1) Quality and effectiveness of presentation
- 2) Depth of knowledge and demonstrated skills
- 3) Variety and relevance of learning experience
- 4) Practical applications and relationships with concepts taught in the course
- 5) Internship Report
- 6) Attendance record, student diary (log), supervisor evaluation

Attendance record shall include daily attendance with IN and OUT time. It shall be signed by Industry supervisor.

Student Diary (log) shall include daily activities carried out by the student during Internship with Task assigned, Activities performed, key learnings etc. It shall be signed by Industry supervisor.

Supervisor evaluation form shall include the following with ratings in FIVE-point scale.

- 1) Behaviours
- 2) Performs in a dependable manner
- 3) Cooperates with co-workers and supervisors
- 4) Shows interest in work
- 5) Learns quickly
- 6) Shows initiative
- 7) Produces high quality work
- 8) Accepts responsibility
- 9) Accepts criticism
- 10) Demonstrates organizational skills
- 11) Uses technical knowledge and expertise
- 12) Shows good judgment
- 13) Demonstrates creativity/originality
- 14) Analyzes problems effectively
- 15) Is self-reliant
- 16) Communicates well
- 17) Writes effectively
- 18) Has a professional attitude
- 19) Gives a professional appearance
- 20) Is punctual
- 21) Uses time effectively

Supervisor evaluation form shall be signed by Industry supervisor.

Mini project:

The student shall carry out a Mini project based on the knowledge acquired during the degree course and/or Internship. The project may be either fully theoretical/practical or involving both theoretical and practical work to be assigned by the guide / mentor / department. The work may also be Study/Survey/Design or R&D work. The work may also be on specified task or project assigned to the students during Internship. The project may also be a sponsored project. The project shall be corresponding to the programme (Major) subject.

Upon completion of the Mini project, the student shall submit project report in the form of hard bound. Assessment for the Mini project shall also include presentation by the student. Assessment of Mini project shall be based on the following criteria:

- 1) Problem Identification / Project Objectives
- 2) Methodology / Design
- 3) Implementation
- 4) Results and Discussion
- 5) Conclusion
- 6) Report
- 7) Depth of Understanding
- 8) Presentation
- 9) Demonstration of the project

Semester – I to VIII
W.E.F. 2024 – 25

Objectives of the Program:

1. To provide a holistic and multidisciplinary technical education that develops all capacities of human beings – intellectual, aesthetic, social, physical, emotional, ethical, and moral – in an integrated manner.
2. To enrich students with new knowledge and skills to engage meaningfully in the emerging socio-economic transformation.
3. To prepare professionals in cutting-edge areas that are fast gaining prominence with important applications to health, environment, and sustainable living for enhancing employability of the youth.

Program Outcomes (POs) for an engineering graduate:

- i. **Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- ii. **Problem Analysis:** Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
- iii. **Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- iv. **Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions for complex problems.
- v. **Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
- vi. **The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- vii. **Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- viii. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- ix. **Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- x. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

SEMESTER – WISE SYLLABUS STRUCTURE OF B. E. (CIVIL)
For KBC NMU Affiliated Colleges, Semester – I to VIII, W.E.F. 2024 – 25

- xi. **Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- xii. **Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and lifelong learning in the broadest context of technological change.

Under Bachelor's Engg./ Tech. Honours Degree in chosen Major Engg./ Tech. Discipline with Multidisciplinary Minor (Multidisciplinary and Honors, 180-194 credits), students would take up five-six additional courses of 18 to 20 credits in the same Engg./ Tech. discipline/ Emerging Areas Specialization distributed over semesters III to VIII. Students will have to compulsorily choose Honors from the same faculty / discipline.

Under Bachelor's Engg./ Tech. Degree in chosen Major Engg./ Tech. Discipline with Double Minor (Multidisciplinary and Specialization Minor, 180-194 credits), students would take up five-six additional courses of 18 to 20 credits in another Engg./ Tech. discipline/ Emerging Areas Specialization distributed over semesters III to VIII. Students will have to compulsorily choose Minor from other faculty / discipline.

Honors offered by Civil for students of the same Branch of Engineering

In addition to 168 credits of UG Engineering Programmes (Bachelor of Engineering) i.e. Major in which the student has taken admission, a student may opt for Honors in the same Engg. / Tech. discipline / branch / Emerging Areas.

A student is required to study additional 20 credits in the same Engg. / Tech. discipline/ branch / Emerging Areas for Honors distributed over semesters III to VIII.

The total number of credits required for completion of the Honors in the same Engg./ Tech. discipline/ Emerging Areas is 20 credits, in addition to 168 credits in Major.

Students will have to compulsorily choose Honors from the same Engg. / Tech. discipline / branch.

Honors Degree in the Bachelor of Engineering programme shall be awarded to students earning additional total credits of all six semesters from second year to final year, i.e., 20 Credits, in addition to 168 credits or 126 credits respectively. The student admitted in first year must earn 168 credits and 126 credits admitted in lateral entry (admitted after Diploma or B.Sc.) at second year.

Honors offered by Civil are as follows.

- A. Infra Structural Engineering
- B. Sustainability Engineering
- C. Construction Technology

The detail syllabus structure for the same is as follows.

Specialization Minor offered by Civil for students of other Branch of Engineering

In addition to 168 credits of UG Engineering Programmes (Bachelor of Engineering) i.e. Major in which the student has taken admission, a student may opt for Specialization Minor in another Engg. / Tech. discipline / branch / Emerging Areas, not in Major Engg. / Tech. discipline / branch.

A student is required to study additional 20 credits in another Engg. / Tech. discipline/ branch / Emerging Areas for Specialization Minor distributed over semesters III to VIII.

The total number of credits required for completion of the Specialization Minor in another Engg./ Tech. discipline/ Emerging Areas is 20 credits, in addition to 168 credits in Major.

Students will have to compulsorily choose Specialization Minor from other Engg. / Tech. discipline / branch, not from Major Engg. / Tech. discipline / branch.

Specialized Minor Degree in the Bachelor of Engineering programme shall be awarded to students earning additional total credits of all six semesters from second year to final year, i.e., 20 Credits, in addition to 168 credits or 126 credits respectively. The student admitted in first year must earn 168 credits and 126 credits admitted in lateral entry (admitted after Diploma or B.Sc.) at second year.

Specialization Minors offered by Civil are as follows.

- A. Sustainability and Industrial Pollution Control
- B. Structural Design
- C. Building Science and Planning

SEMESTER – WISE SYLLABUS STRUCTURE

For Affiliated Colleges

Semester – I to VIII

W.E.F. 2024 – 25

Objectives of the Program:

1. To provide a holistic and multidisciplinary technical education that develops all capacities of human beings – intellectual, aesthetic, social, physical, emotional, ethical, and moral – in an integrated manner.
2. To enrich students with new knowledge and skills to engage meaningfully in the emerging socio-economic transformation.
3. To prepare professionals in cutting-edge areas that are fast gaining prominence with important applications to health, environment, and sustainable living for enhancing employability of the youth.

Program Outcomes (POs) for an engineering graduate:

- i. **Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- ii. **Problem Analysis:** Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
- iii. **Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- iv. **Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions for complex problems.
- v. **Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
- vi. **The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- vii. **Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- viii. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- ix. **Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- x. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

SEMESTER – WISE SYLLABUS STRUCTURE OF B. E. (COMPUTER)
For KBC NMU Affiliated Colleges, Semester – I to VIII, W.E.F. 2024 – 25

- xi. **Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- xii. **Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and lifelong learning in the broadest context of technological change.

Under Bachelor's Engg./ Tech. Honours Degree in chosen Major Engg./ Tech. Discipline with Multidisciplinary Minor (Multidisciplinary and Honors, 180-194 credits), students would take up five-six additional courses of 18 to 20 credits in the same Engg./ Tech. discipline/ Emerging Areas Specialization distributed over semesters III to VIII. Students will have to compulsorily choose Honors from the same faculty / discipline.

Under Bachelor's Engg./ Tech. Degree in chosen Major Engg./ Tech. Discipline with Double Minor (Multidisciplinary and Specialization Minor, 180-194 credits), students would take up five-six additional courses of 18 to 20 credits in another Engg./ Tech. discipline/ Emerging Areas Specialization distributed over semesters III to VIII. Students will have to compulsorily choose Minor from other faculty / discipline.

Semester wise Credit distribution structure for Four Year UG Engineering Program with Specialization Minor (Additional 20 credits):

Semester	I	II	III	IV	V	VI	VII	VIII	Total Credits
Program Core Course (PCC)			4	4	4	4		4	20

Students will have the flexibility to enter a programme in odd semesters and exit a programme after the successful completion of even semesters as per their future career needs. Students exiting will be awarded provided they secure additional EIGHT credits in skill-based vocational courses.

The credit structure for different levels under the Four-year Bachelor's Multidisciplinary Engineering UG Programme with multiple entry and multiple exit options are as given below:

Level	Qualification Title	Credit Requirements	Semester	Year
4.5	One Year UG Certificate in Engg./ Tech.	42	2	1
5.0	Two Years UG Diploma in Engg./ Tech.	84	4	2
5.5	Three Years Bachelor's Degree in Vocation (B. Voc.) or B. Sc. (Engg./ Tech.)	126	6	3
6.0	4-Years Bachelor's degree (B.E./ B.Tech. or Equivalent) in Engg./ Tech. with Multidisciplinary Minor	168	8	4

Honors offered by Computer for students of the same Branch of Engineering

In addition to 168 credits of UG Engineering Programmes (Bachelor of Engineering) i.e. Major in which the student has taken admission, a student may opt for Honors in the same Engg. / Tech. discipline / branch / Emerging Areas.

A student is required to study additional 20 credits in the same Engg. / Tech. discipline/ branch / Emerging Areas for Honors distributed over semesters III to VIII.

The total number of credits required for completion of the Honors in the same Engg./ Tech. discipline/ Emerging Areas is 20 credits, in addition to 168 credits in Major.

Students will have to compulsorily choose Honors from the same Engg. / Tech. discipline / branch.

Honors Degree in the Bachelor of Engineering programme shall be awarded to students earning additional total credits of all six semesters from second year to final year, i.e., 20 Credits, in addition to 168 credits or 126 credits respectively. The student admitted in first year must earn 168 credits and 126 credits admitted in lateral entry (admitted after Diploma or B.Sc.) at second year.

Honors offered by Computer are as follows.

- A. Data Science
- B. Blockchain
- C. Cyber Security

The detail syllabus structure for the same is as follows.

Specialization Minor offered by Computer for students of other Branch of Engineering

In addition to 168 credits of UG Engineering Programmes (Bachelor of Engineering) i.e. Major in which the student has taken admission, a student may opt for Specialization Minor in another Engg. / Tech. discipline / branch / Emerging Areas, not in Major Engg. / Tech. discipline / branch.

A student is required to study additional 20 credits in another Engg. / Tech. discipline/ branch / Emerging Areas for Specialization Minor distributed over semesters III to VIII.

The total number of credits required for completion of the Specialization Minor in another Engg./ Tech. discipline/ Emerging Areas is 20 credits, in addition to 168 credits in Major.

Students will have to compulsorily choose Specialization Minor from other Engg. / Tech. discipline / branch, not from Major Engg. / Tech. discipline / branch.

Specialized Minor Degree in the Bachelor of Engineering programme shall be awarded to students earning additional total credits of all six semesters from second year to final year, i.e., 20 Credits, in addition to 168 credits or 126 credits respectively. The student admitted in first year must earn 168 credits and 126 credits admitted in lateral entry (admitted after Diploma or B.Sc.) at second year.

Specialization Minors offered by Computer are as follows.

- A. Data Science
- B. Virtual Reality and Augmented Reality
- C. Cyber Security

The detail syllabus structure for the same is as follows.

SEMESTER – WISE SYLLABUS STRUCTURE

For Affiliated Colleges

Semester – I to VIII

W.E.F. 2024 – 25

Objectives of the Program:

1. To provide a holistic and multidisciplinary technical education that develops all capacities of human beings – intellectual, aesthetic, social, physical, emotional, ethical, and moral – in an integrated manner.
2. To enrich students with new knowledge and skills to engage meaningfully in the emerging socio-economic transformation.
3. To prepare professionals in cutting-edge areas that are fast gaining prominence with important applications to health, environment, and sustainable living for enhancing employability of the youth.

Program Outcomes (POs) for an engineering graduate:

- i. **Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- ii. **Problem Analysis:** Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
- iii. **Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- iv. **Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions for complex problems.
- v. **Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
- vi. **The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- vii. **Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- viii. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- ix. **Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- x. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

SEMESTER – WISE SYLLABUS STRUCTURE OF B. E. (ELECTRONICS AND TELECOMMUNICATION)
For KBC NMU Affiliated Colleges, Semester – I to VIII, W.E.F. 2024 – 25

- xi. **Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- xii. **Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and lifelong learning in the broadest context of technological change.

Under Bachelor's Engg./ Tech. Honours Degree in chosen Major Engg./ Tech. Discipline with Multidisciplinary Minor (Multidisciplinary and Honors, 180-194 credits), students would take up five-six additional courses of 18 to 20 credits in the same Engg./ Tech. discipline/ Emerging Areas Specialization distributed over semesters III to VIII. Students will have to compulsorily choose Honors from the same faculty / discipline.

Under Bachelor's Engg./ Tech. Degree in chosen Major Engg./ Tech. Discipline with Double Minor (Multidisciplinary and Specialization Minor, 180-194 credits), students would take up five-six additional courses of 18 to 20 credits in another Engg./ Tech. discipline/ Emerging Areas Specialization distributed over semesters III to VIII. Students will have to compulsorily choose Minor from other faculty / discipline.

Honors offered by Electronics and Telecommunication for students of the same Branch of Engineering

In addition to 168 credits of UG Engineering Programmes (Bachelor of Engineering) i.e. Major in which the student has taken admission, a student may opt for Honors in the same Engg. / Tech. discipline / branch / Emerging Areas.

A student is required to study additional 20 credits in the same Engg. / Tech. discipline/ branch / Emerging Areas for Honors distributed over semesters III to VIII.

The total number of credits required for completion of the Honors in the same Engg./ Tech. discipline/ Emerging Areas is 20 credits, in addition to 168 credits in Major.

Students will have to compulsorily choose Honors from the same Engg. / Tech. discipline / branch.

Honors Degree in the Bachelor of Engineering programme shall be awarded to students earning additional total credits of all six semesters from second year to final year, i.e., 20 Credits, in addition to 168 credits or 126 credits respectively. The student admitted in first year must earn 168 credits and 126 credits admitted in lateral entry (admitted after Diploma or B.Sc.) at second year.

Honors offered by Electronics and Telecommunication are as follows.

- A. 5G and Advance Technology
- B. VLSI Design and Technology
- C. Data Science

SEMESTER: I

Paper: 516 A: Industry 4.0

60 + 40 Pattern: External Marks 60 + Internal Marks 40 = Maximum

Total Marks: 100 Required

Lectures: 48 hours

Course Description:

This course provides an in-depth understanding of Industry 4.0, tracing its evolution from previous industrial revolutions. It examines the impact of digital transformation on business models, the role of data analytics, and the importance of cyber security. The course also explores emerging technologies and strategic management practices essential for successful Industry 4.0 adoption and implementation.

Course Objectives:

1. To understand the evolution of Industry 4.0, including its historical context.
2. To analyze the impact of digital transformation on business models, focusing on platform-based models.
3. To evaluate the role of data analytics, cyber security, and ethical considerations in Industry 4.0.
4. To explore and develop strategies for adopting and leveraging emerging technologies within various sectors.

Course Outcomes:

1. **Identify** and **explain** the key technologies and drivers of Industry 4.0.
2. **Assess** shifts in business models due to digital transformation
3. **Utilize** data analytics techniques to support decision-making processes in Industry 4.0.
4. **Evaluate** cyber security measures and ethical considerations in Industry 4.0 implementations.
5. **Develop** strategies to leverage emerging technologies for competitive advantage.
6. **Design and Implement** strategic plans for Industry 4.0 adoption

Course Assessment & Evaluation Criteria

Components	Weight	Per Course Marks
Class Participation * and Home Assignments (It can be weekly)	12.5%	5
Presentation (assign topics & posters), Classroom writing Skill, Quizzes & Allied Assignment	12.5%	5
Internal Test	75%	30
External Exam	60%	60
Total Marks		100

Unit 1: Introduction to Industry 4.0

(8)

- a. Definition and Evolution of Industry 4.0
- b. Historical context: Industry 1.0 to Industry 4.0
- c. Key Drivers and Technologies of Industry 4.0- Internet of Things (IoT), Cyber-Physical Systems, Big Data and Analytics, Artificial Intelligence and Machine Learning and Cloud Computing
- d. Overview of Society 5.0.

Unit 2: Digital Transformation and Business Models

(8)

- a. Concept of Digital Transformation
- b. Shifts in Business Models: From Traditional to Platform-Based Models
- c. New Business Models in Industry 4.0- Platform-Based, Subscription-Based, Product-as-a-Service(PaaS)

- d. Challenges and Best Practices in Digital Transformation
- e. Case Studies on Digital Transformation and Business Models

Unit 3: Data Analytics and Decision Making (8)

- o Role and Importance of Data Analytics in Industry 4.0
- o Types of Data Analytics
- o Data Visualization Tools and Techniques
- o Case Studies on Data-Driven Decision Making

Unit 4: Cybersecurity and Ethical Issues (8)

- a. Importance of Cybersecurity in Industry 4.0
- b. Common Cybersecurity Threats and Risks
- c. Ethical Considerations and Data Privacy
- d. Regulatory Frameworks and Compliance
- e. Case Studies on Cybersecurity and Ethical Issues

Unit 5: Innovations and Technologies (8)

- a. Overview of Emerging Technologies- Blockchain, Augmented Reality (AR) and Virtual Reality(VR), Robotics and Automation
- b. Role of Innovation in Maintaining Competitive Edge
- c. Case Studies of Innovative Technologies in Practice

Unit 6: Implementation and Future of Industry 4.0 (8)

- 6.1 Strategic Planning for Industry 4.0 Adoption
- 6.2 Critical Success Factors, Obstacles and Risk Management
- 6.3 Implementation Strategies and Change Management
- 6.4 Case studies and applications in various sectors viz., Healthcare, Agriculture, Manufacturing, Banking, Logistics, and Supply Chain Management

MBA 516B: Business Ethics and Corporate Governance

60 + 40 Pattern: External Marks 60 + Internal Marks 40 = Maximum Total Marks: 100

Required Lectures: 48 hours

Course Description:

This course is designed to develop in the students an understanding of the concept of Business Ethics and its application in business decision making with emphasize on CSR and sustainable business practices in the age of Globalization. It also aims at providing the students the understanding of ethical issues related to business and good governance necessary for long term survival of business.

Course Objectives:

- To provide fundamental knowledge about Business ethics and CSR
- To create strong foundation for further studies in the field of Ethics and CSR
- To prepare students to play an active part in corporate governance.

Course Outcomes: On successful completion of the course, the students will be able to

1. **Acquire** conceptual understanding of Business Ethics
2. **Understand** ethical issues in functional areas of management
3. **Analyze** and apply CSR Principles & Strategies
4. **Plan and execute** CSR activities in organization
5. **Understand** professional ethics for business
6. **Acquire** conceptual understanding of Corporate Governance

Unit – I Social Issues (6)

- 1.1 Concept, Characteristic, Nature and Causes of Social Problems
- 1.2 Social problems in Indian context
- 1.3 Social Issues in corporate environment: Casteism, Corruption, Black money, Sexual Harassment at workplace & their impact on Society
- 1.4 Why social issues are business issues?

Unit – II Business Ethics (6)

- 2.1 Definition, Objective and Nature of Business Ethics
- 2.2 Importance of Business Ethics, Factors influencing Business Ethics
- 2.3 Ethical Theories: Utilitarianism, Virtue, social contract theory
- 2.4 Ethical Dilemma, Types of ethical dilemmas.

2.5 Culture: Cultural differences, Hofstede Dimensions of Cultural Differences, cultural discrimination

Unit – III Ethical Decision Making (8)

- 3.1 Values, Morals, Norms, Beliefs
- 3.2 Characteristics of moral standards, Kohlberg's model of cognitive moral development
- 3.3 Applied Ethics, Code of Ethics, Code of Conduct and Code of Practice
- 3.4 Ethical Decision Making Process, Ethical consistency, Ethical decision making models
- 3.5 Individual Factors, and Organizational Factors Contributing to Unethical Behavior

Unit – IV Professional Ethics (8)

- 4.1 Elements for developing ethical corporate behavior, Importance Professional ethics
- 4.2 Ethics in Marketing, Ethics in HRM, Ethics in Finance & Accounting, Ethics in Information Technology
- 4.3 Business Ethics in Global Economy, and international business management
- 4.4 Relationship between Business Ethics & Business Development, Role of Business Ethics in Building a Civilized Society.

Unit – V Ethics and Corporate Social Responsibility (10)

- 5.1 Concept, Key aspects, Scope & Importance of Corporate Social Responsibility
- 5.2 Business ethics and CSR, Types of CSR, CSR Principles & Strategies
- 5.3 Criterion for determining the Social Responsibility of Business,
- 5.4 Corporate social responsiveness, Corporate Social performance. CSR as organizational Brand building effort.
- 5.5 CSR Activity planning & Execution, CSR law under companies' act 2013, CSR Ratings

Unit- VI Corporate Governance (10)

- 6.1 Definition, Characteristics, Structure & Need and purpose of Corporate Governance
- 6.2 Principles of Corporate Governance, Role players in corporate governance
- 6.3 Issues, Benefits and Limitations in Corporate Governance
- 6.4 Corporate Governance Models: Anglo-American, European, and Asian Models
- 6.5 Corporate Governance Practices in India

MBA 516 C SWAYAM / MOOC Courses

60 + 40 Pattern: External Marks 60 + Internal Marks 40 = Maximum Total Marks: 100

Required Lectures: 48 hours

SWAYAM OR NPTEL OR MOOC Courses :

Students can complete Online course of total 4 credits through online platform of SWAYAM/NPTEL/MOOCs or equivalent for sector skill as per stated in the AICTE regulation (2016) or equivalent.

Any course with credits as per available list and schedule can be opted by student in the form of SWAYAM/NPTEL/MOOCs or equivalent, provided the student secures the certificate after completion of examination through same course link .courses from other course providers , from other platforms shall not be considered valid unless recommended by BOS .

The students should submits a valid course completion certificate with credit before external exams and by the end of II semester, which will be added to the second semester marks statement

If 4 credit courses are not available then student may opt for 2 credit two courses.

At least 80% contents of the NPTEL/SWAYAM/MOOC or equivalent as per NSQR framework ,skill council of India course should match with syllabus contents of the subject prescribed by the university.

SEMESTER – WISE SYLLABUS STRUCTURE
For Affiliated Colleges
Semester – I to VIII
W.E.F. 2024 – 25

Objectives of the Program:

1. To provide a holistic and multidisciplinary technical education that develops all capacities of human beings – intellectual, aesthetic, social, physical, emotional, ethical, and moral – in an integrated manner.
2. To enrich students with new knowledge and skills to engage meaningfully in the emerging socio-economic transformation.
3. To prepare professionals in cutting-edge areas that are fast gaining prominence with important applications to health, environment, and sustainable living for enhancing employability of the youth.

Program Outcomes (POs) for an engineering graduate:

- i. **Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- ii. **Problem Analysis:** Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
- iii. **Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- iv. **Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions for complex problems.
- v. **Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
- vi. **The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- vii. **Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- viii. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- ix. **Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- x. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

Honors offered by Mechanical for students of the same Branch of Engineering

In addition to 168 credits of UG Engineering Programmes (Bachelor of Engineering) i.e. Major in which the student has taken admission, a student may opt for Honors in the same Engg. / Tech. discipline / branch / Emerging Areas.

A student is required to study additional 20 credits in the same Engg. / Tech. discipline/ branch / Emerging Areas for Honors distributed over semesters III to VIII.

The total number of credits required for completion of the Honors in the same Engg./ Tech. discipline/ Emerging Areas is 20 credits, in addition to 168 credits in Major.

Students will have to compulsorily choose Honors from the same Engg. / Tech. discipline / branch.

Honors Degree in the Bachelor of Engineering programme shall be awarded to students earning additional total credits of all six semesters from second year to final year, i.e., 20 Credits, in addition to 168 credits or 126 credits respectively. The student admitted in first year must earn 168 credits and 126 credits admitted in lateral entry (admitted after Diploma or B.Sc.) at second year.

Honors offered by Mechanical are as follows.

- A. Robotics
- B. 3D Printing
- C. Energy Engineering

**SEMESTER – WISE SYLLABUS STRUCTURE
For Affiliated Colleges
Semester – I to VIII
W.E.F. 2024 – 25**

Objectives of the Program:

1. To provide a holistic and multidisciplinary technical education that develops all capacities of human beings – intellectual, aesthetic, social, physical, emotional, ethical, and moral – in an integrated manner.
2. To enrich students with new knowledge and skills to engage meaningfully in the emerging socio-economic transformation.
3. To prepare professionals in cutting-edge areas that are fast gaining prominence with important applications to health, environment, and sustainable living for enhancing employability of the youth.

Program Outcomes (POs) for an engineering graduate:

- i. **Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- ii. **Problem Analysis:** Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
- iii. **Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- iv. **Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions for complex problems.
- v. **Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
- vi. **The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- vii. **Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- viii. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- ix. **Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- x. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

SEMESTER – WISE SYLLABUS STRUCTURE OF B. E. (ELECTRICAL)
For KBC NMU Affiliated Colleges, Semester – I to VIII, W.E.F. 2024 – 25

- xi. **Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- xii. **Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and lifelong learning in the broadest context of technological change.

Under Bachelor's Engg./ Tech. Honours Degree in chosen Major Engg./ Tech. Discipline with Multidisciplinary Minor (Multidisciplinary and Honors, 180-194 credits), students would take up five-six additional courses of 18 to 20 credits in the same Engg./ Tech. discipline/ Emerging Areas Specialization distributed over semesters III to VIII. Students will have to compulsorily choose Honors from the same faculty / discipline.

Under Bachelor's Engg./ Tech. Degree in chosen Major Engg./ Tech. Discipline with Double Minor (Multidisciplinary and Specialization Minor, 180-194 credits), students would take up five-six additional courses of 18 to 20 credits in another Engg./ Tech. discipline/ Emerging Areas Specialization distributed over semesters III to VIII. Students will have to compulsorily choose Minor from other faculty / discipline.

Students will have the flexibility to enter a programme in odd semesters and exit a programme after the successful completion of even semesters as per their future career needs. Students exiting will be awarded provided they secure additional EIGHT credits in skill-based vocational courses.

The credit structure for different levels under the Four-year Bachelor's Multidisciplinary Engineering UG Programme with multiple entry and multiple exit options are as given below:

Level	Qualification Title	Credit Requirements	Semester	Year
4.5	One Year UG Certificate in Engg./ Tech.	42	2	1
5.0	Two Years UG Diploma in Engg./ Tech.	84	4	2
5.5	Three Years Bachelor's Degree in Vocation (B. Voc.) or B. Sc. (Engg./ Tech.)	126	6	3
6.0	4-Years Bachelor's degree (B.E./ B.Tech. or Equivalent) in Engg./ Tech. with Multidisciplinary Minor	168	8	4

Honors offered by Electrical for students of the same Branch of Engineering

In addition to 168 credits of UG Engineering Programmes (Bachelor of Engineering) i.e. Major in which the student has taken admission, a student may opt for Honors in the same Engg. / Tech. discipline / branch / Emerging Areas.

A student is required to study additional 20 credits in the same Engg. / Tech. discipline/ branch / Emerging Areas for Honors distributed over semesters III to VIII.

The total number of credits required for completion of the Honors in the same Engg./ Tech. discipline/ Emerging Areas is 20 credits, in addition to 168 credits in Major.

Students will have to compulsorily choose Honors from the same Engg. / Tech. discipline / branch.

Honors Degree in the Bachelor of Engineering programme shall be awarded to students earning additional total credits of all six semesters from second year to final year, i.e., 20 Credits, in addition to 168 credits or 126 credits respectively. The student admitted in first year must earn 168 credits and 126 credits admitted in lateral entry (admitted after Diploma or B.Sc.) at second year.

Honors offered by Electrical are as follows.

- A. High Voltage and Power Systems Engineering
- B. Microgrid Technologies
- C. Electrical Energy Systems

SEMESTER – WISE SYLLABUS STRUCTURE

For Affiliated Colleges

Semester – I to VIII

W.E.F. 2024 – 25

Objectives of the Program:

1. To provide a holistic and multidisciplinary technical education that develops all capacities of human beings – intellectual, aesthetic, social, physical, emotional, ethical, and moral – in an integrated manner.
2. To enrich students with new knowledge and skills to engage meaningfully in the emerging socio-economic transformation.
3. To prepare professionals in cutting-edge areas that are fast gaining prominence with important applications to health, environment, and sustainable living for enhancing employability of the youth.

Program Outcomes (POs) for an engineering graduate:

- i. **Engineering Knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems.
- ii. **Problem Analysis:** Identify, formulate, review research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
- iii. **Design/Development of Solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations.
- iv. **Conduct Investigations of Complex Problems:** Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions for complex problems.
- v. **Modern Tool Usage:** Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations.
- vi. **The Engineer and Society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice.
- vii. **Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development.
- viii. **Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- ix. **Individual and Team Work:** Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings.
- x. **Communication:** Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions.

SEMESTER – WISE SYLLABUS STRUCTURE OF B. E. (ELECTRONICS AND TELECOMMUNICATION)
For KBC NMU Affiliated Colleges, Semester – I to VIII, W.E.F. 2024 – 25

- xi. **Project Management and Finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments.
- xii. **Life-long Learning:** Recognize the need for, and have the preparation and ability to engage in independent and lifelong learning in the broadest context of technological change.

Under Bachelor's Engg./ Tech. Honours Degree in chosen Major Engg./ Tech. Discipline with Multidisciplinary Minor (Multidisciplinary and Honors, 180-194 credits), students would take up five-six additional courses of 18 to 20 credits in the same Engg./ Tech. discipline/ Emerging Areas Specialization distributed over semesters III to VIII. Students will have to compulsorily choose Honors from the same faculty / discipline.

Under Bachelor's Engg./ Tech. Degree in chosen Major Engg./ Tech. Discipline with Double Minor (Multidisciplinary and Specialization Minor, 180-194 credits), students would take up five-six additional courses of 18 to 20 credits in another Engg./ Tech. discipline/ Emerging Areas Specialization distributed over semesters III to VIII. Students will have to compulsorily choose Minor from other faculty / discipline.

Students will have the flexibility to enter a programme in odd semesters and exit a programme after the successful completion of even semesters as per their future career needs. Students exiting will be awarded provided they secure additional EIGHT credits in skill-based vocational courses.

The credit structure for different levels under the Four-year Bachelor's Multidisciplinary Engineering UG Programme with multiple entry and multiple exit options are as given below:

Level	Qualification Title	Credit Requirements	Semester	Year
4.5	One Year UG Certificate in Engg./ Tech.	42	2	1
5.0	Two Years UG Diploma in Engg./ Tech.	84	4	2
5.5	Three Years Bachelor's Degree in Vocation (B. Voc.) or B. Sc. (Engg./ Tech.)	126	6	3
6.0	4-Years Bachelor's degree (B.E./ B.Tech. or Equivalent) in Engg./ Tech. with Multidisciplinary Minor	168	8	4

Open Elective

A Student can opt for any one subject out of available institute wide subjects defined in the following list as Open Elective provided, he/she has not taken that particular subject in his/her Programme core, Programme elective, Multidisciplinary Minor, other Open elective and Vocational and Skill Enhancement courses etc. throughout his / her four years of UG Engineering Programme. The student must opt a subject that is compulsorily from faculty other than that of the Major discipline.

Course Code	Name of the Subject / Course	Faculty Offered by	Department Offered by

Honors offered by Electronics and Telecommunication for students of the same Branch of Engineering

In addition to 168 credits of UG Engineering Programmes (Bachelor of Engineering) i.e. Major in which the student has taken admission, a student may opt for Honors in the same Engg. / Tech. discipline / branch / Emerging Areas.

A student is required to study additional 20 credits in the same Engg. / Tech. discipline/ branch / Emerging Areas for Honors distributed over semesters III to VIII.

The total number of credits required for completion of the Honors in the same Engg./ Tech. discipline/ Emerging Areas is 20 credits, in addition to 168 credits in Major.

Students will have to compulsorily choose Honors from the same Engg. / Tech. discipline / branch.

Honors Degree in the Bachelor of Engineering programme shall be awarded to students earning additional total credits of all six semesters from second year to final year, i.e., 20 Credits, in addition to 168 credits or 126 credits respectively. The student admitted in first year must earn 168 credits and 126 credits admitted in lateral entry (admitted after Diploma or B.Sc.) at second year.

Honors offered by Electronics and Telecommunication are as follows.

- A. 5G and Advance Technology
- B. VLSI Design and Technology
- C. Data Science

Internal Continuous Evaluation System in place

The internal continuous evaluation system in place at this college level is done as per University guidelines currently enforce/ received before the start of term. The schedule for, performance of practicals is notified on the departmental lab notice board. This schedule is batchwise and it also indicates the completion/ submission date of practical, drawing and assignment sheets. It is meant for those subjects for whom term work marks are to be sent to the University.

The attendance record of the students is maintained in ERP software and in the register meant for this purpose. This register also evaluates the performance of the students under the following headings:

- a) Attendance in class/practical
- b) Performance in class/practical
- c) Class tests/ viva voce
- d) Assignment/ Journal

The above are quantified and marks are awarded in the next week, displayed and consolidated at the end of term. At term end the term work assessment programme is displayed and the work is evaluated by two faculty members who are appointed by the Principal and the term work marks are forwarded to the University under the signature of both the examiners.

Students' assessment of Faculty, System in place.

. During the 5th week of the term the feedback by the students is taken subject wise for the staff who teach them. A set of questionnaire is circulated them and feedback is obtained. This feedback is taken by academic monitoring committee comprising of three HOD's and Coordinator of Academic and Research and Development. The feedback is submitted to the Principal and he apprises the faculty member about their weak points and they are given the opportunity to improve upon their deficiencies and their weak points during the term itself.

Also during the term, students are free to pass on the difficulties through suggestion boxes kept at various location and if they are related to their academic difficulties, their difficulties are solved and the concerned faculty is advised by the Principal with sole aim of improvement in academics. Personal hearing is given by Coordinator of Academics and Research and Development and the Principal.
